Home Security: Protect Your Family During the Holiday Season by Valerie Low

Article published on December 14th 2011 | Home Security

Dallas is one of the biggest cities in the United States. It is no surprise that the city has rapidly growing crime rates. A lot of homeowners are considering home alarm systems to protect their valuable belongings and a lot more importantly their loved ones.

While doing holiday shopping at the mall the other day, I was talking to a lady in front of me in line. She told me 2 weeks before somebody followed her home and threatened to rob her in front of her house. She called the Dallas police right away and filed a police report, and fortunately nothing was taken; but what truly bothered her is that this individual knew where she lived and was still out there.

It is really important to keep in mind as the holidays approach that crime is increasing; why risk letting someone steal your valuables or risk your family's safety by not fully securing your home?.

Here are simply a couple of ways a home security system can help you protect your home and family this holiday season:

- Monitor your house while you are out of town visiting your friends and family during the holidays. This helps maintain peace of mind knowing that you'll be notified instantly if your house is broken into- excellent way to protect all those expensive holiday presents.

- Protect your Holiday presents from Grinches. You might have just bought a big screen TV or a new laptop as a Christmas gift for someone. Don't put these big presents under the tree until Christmas Eve. The most important thing to remember is to arm your security system when you're not home.

- Control your security system remotely from work, the mall, or anywhere you have your cell phone. You can utilize system features remotely from your smart phone or computer; making it convenient to disarm the system for your house cleaner or sitter while you are away.

- Get notifications when your family arrives home from school or work to know that they are safe and sound. Monitoring the house until you are home is a smart way to keep an eye on your children. Assign a specific user code for each of your family members or the sitter. That way you are able to know when they get in the house and when they leave the house.

- Schedule reminders to arm or disarm your alarm in case you don't remember. This is really useful when you're rushing out the door to all of the holiday parties and family gatherings.

Home owners of Dallas find it easier to be investing in securing their homes rather than paying the consequences later. All it takes is one terrifying event to ruin the holidays and maybe more. And that is why Dallas home security is our top priority.
