Give your home a unique facelift with laminate flooring by Robert Meccale

Article published on May 29th 2012 | Interior Design

There are numerous advantages of laminate flooring over traditional hardwood flooring. The best thing about laminate flooring is that it gives the appearance of hardwood without the cost or installation issues involved with hardwood flooring. This type of flooring is generally less expensive than traditional flooring and even home owners can do it themselves. By spending some time on choosing from a range of laminate options and best laminate dÃ©cor ideas and possibilities, you can ensure that your home gets a unique facelift.

Laminate is undoubtedly the best material available for flooring purpose. Laminates come in different varieties such as decorative laminates, composite laminate, and high pressure laminate etc. Come and explore something new in your home with laminate flooring ideas.

If you have a small room, you can go for narrow laminate flooring that generally comes in widths of 2 Â¼ inches. This type of flooring visually enhances the size of a room, making it look relatively bigger. On the other hand, wide laminate flooring is found to be perfect for larger rooms. This is done by using boards of at least 3 inches in width. These wider boards emphasize the open and airy feel of a larger space. As these boards are wide, you will need fewer of them, which will result in time and cost saving.

While buying composite laminate for flooring purpose, consider buying contrasting colors of the same laminate flooring. Go for a deep brown board for a darker floor, contrasting with a chestnut brown board. In case of lighter floors, you can use a golden oak, contrasted with a lighter pine. Contrasting colors infuse texture and visual appeal to a room.

Decorative laminates come in different colors and by using them creatively you can make big difference to the look and feel of your home. If you think your bedroom is not up to the mark, consider installing a deeply stained laminate floor to compliment the mood of the rest of your dÃ©cor. Similarly, you can try your own dÃ©cor ideas to spruce up your home dÃ©cor in a wonderful way. Not only flooring, but you can use laminates for vertical application as well such as countertops, shelves, table tops, etc. The only thing you need to take care of is to buy decorative laminates from a reliable brand. This is because quality is the most prominent factor in choosing laminate products. Carry out a comprehensive research before ordering.
