Article published on February 27th 2012 | Interior Design

Nevertheless, how often do we think whether the product will also prove appealing when it comes to quality and durability? It is time now to seek substance with style and not every product in the category fits the bill. However, if it is about laminates, then the story is entirely different.

Now more and more products from the laminate family have been introduced in the markets that are exceedingly durable and extremely classy. Just what we mean by style with substance. Therefore, in this article, we will talk about a few products from the laminate family that have changed the way design and decor are perceived.

Compact grade laminate â€“ A high usability laminate product, compact grade laminate is a great fit for kitchen countertops and dining table tops. These can bear high pressure, and are extremely resistant to heat and abrasion. In terms of looks, compact grade laminates score high as they are available in a variety of colours and textures.

Composite laminate â€“ Germ free and water resistant, composite laminate is uniquely designed for usage around the bathroom space. Your bathroom will remain glossy; appear spic and span if you use composite laminates for the sink area, the partitions and the shower room.

If your are looking for something different and out-of-the-box for your bathroom, then you can also go for decorative variety of composite laminates for the bathroom countertops.

Decorative laminate â€“ A very popular form of laminate from the family, decorative laminate is a revolution in itself. Available in a range of colours, textures, designs and themes, when it comes to finding the best match for your living room, your bedroom or any other space of your choice, decorative laminates are just unmatched.

Postforming laminates â€“ It is the rebirth of seamlessness. Now, gone are the days when furnishings had rough edges and crevices. Postforming laminates have the malleability to die for. It flows like water on the furniture and touches every nook and corner giving the furniture a smooth finish.

Eco friendly laminates â€“ It is an innovation from the laminate family. Eco friendly laminates emit less harmful chemicals into the surroundings when compared to any other wood product. This helps in keeping the environment clean and also adds to carbon credits.

These and many more products together make laminates the ultimate choice when it comes to looking for a product that exudes both style and substance.
