How to Create Unique Designs with Custom Facebook Page by [Julia Roger](#)

Article published on July 30th 2012 | [Internet](#)

Do you love social networking? If the answer is a yes, then you are definitely on facebook, the much talked about networking site popular across the world. There are multiple options to stay connected with friends and family in every step of life. But to stay ahead of the crowd and project an image out of the box, give yourself the scope to design custom facebook page. It is the most unique opportunity for you to customize the page exactly the way you want.

But the question is how to create a unique design for the page?

Ideas for you

First, you start by adding tabs to the profile page. custom facebook page design is one of the greatest inventions in recent times. The tabs help in adding extra functionalities to the profile page with interesting information by incorporating various media tools like videos, photos, games and also important links.

Download plug-in facebook, known as FBML static or facebook markup language. It is a useful application that will eventually help in adding a box to the page that will execute HTML codes to help in enhancing customization. Click the option "add to my page"™, that will bring flurry of scopes for it.

Once you click the Add to page button you will be able to add the tabs that you want. Then, you are directed to custom page where you get to click the Edit page. Eventually click the application link. Thus, you are now able to open a page standing out from the rest, with special impression to attract eyeballs and traffic.

Customized facebook business page is most sought-after by business people. They look out for special designs that help in creating pages of your fancy so that you get to hitch more business deals. The idea is to create an appeal that will attract other business enthusiasts.

The idea is to be different and extend your network. This is possible with customized facebook page with unique designs.
