How-to: Get bbc iPlayer in the US? by [Majestyseo](#)

Article published on December 28th 2011 | [Internet](#)

If you want to get bbc iPlayer in the US, you should consider using a VPN. So, let us take a look at what VPN is and how can it help you to get bbc iPlayer in the US.

One is not limited by their physical location, when it goes about joining a VPN. You can access a VPN through your Internet connection in order to get bbc iPlayer in the US.

This means, you can join any VPN in any location of the world. So, what good would a VPN do in respect of getting bbc iPlayer in the US? The problem with hulu is that they limit the access to their video database. These limits are set, based on your computer IP address. Every PC that connects to the Internet is assigned a certain address, called IP address. This address shows your physical location. So, once you visit hulu web site, they immediately see, where you come from.

If you location is not UK, they kick you out. You do not get to stream any of their shows. Now, the key to getting bbc iplayer in the US is one of the VPN's features. Once you join a VPN, instead of your actual IP address, all the web sites, you land on, begin to see your VPN's IP address which allows you to get bbc iPlayer in the US.

So, here is the solution. You should join a USA based VPN and assign your PC an American IP address. This means, that if you land on hulu now, instead of your Korean IP, they see your VPN USA IP address and let you watch their videos. Joining a VPN is an easy and affordable way to get bbc iplayer in the US.

Now, there are many free VPNs out there, but most of them do not grand access to hulu. The trick is to find a good paid UK based VPN to get bbc iplayer in the US. They all charge a small monthly fee for their services. Now, those services are not limited by allowing you to watch bbc iplayer in the US. Joining a VPN, you provide yourself with more freedom in internet surfing and safer Internet experience.

For one, they cannot identify your real IP anymore. All the hackers or online virus direct attackers see your VPN's IP and that is where their attack would first go. So, with a VPN you protect your PC from direct attacks. Most VPNs have strong firewall protection, they pass on to their members. So, besides streamlining bbc iplayer in the US, you get many additional benefits of using a VPN.
