Hulu UK. is that real?

by Jack Hauck

Article published on December 19th 2011 | Internet

The problem with hulu UK is that hulu is not open for anyone outside the US. It restricts the access to its viewers, based on where they connect to the Internet. Actually, they kick you out of hulu, as soon, as they see your British IP address. If it is not USA, hulu shuts down streamlining for you.

So, is hulu UK real? Well, there are certain ways you can change you IP address to the desired one and still get hulu UK. Some people use ads on to their browsers to get hulu UK. These ads change the IP address of your PC. When you land on hulu, it does not see your actual location in UK. Instead, it sees your fake USA IP address.

There are many problems with this way of getting hulu UK. For one, the ads on make your browser and internet work much slower. Even if you manage to access hulu UK through them, you get slow streamlining of video and long buffer times to wait for videos to load. That makes you hulu experience much less enjoyable and its shows less watchable.

There is another more efficient solution for getting hulu UK. That is using VPN. VPN stands for virtual personal network. The thing is that when you join such a network, your PC gets their IP address, instead of yours. So, if you can find a good USA based VPN to join, you get their IP address, too. VPNs offer many valuable services, besides letting you have hulu UK.

But joining an American VPN can provide you with complete access to hulu and get you streamlining your favorite shows at the maximum speed of your VPN connection. VPN does not slow down you internet connection and allows you to eliminate those dull buffer times.

So, if you are ready to join a VPN, you should be aware, that it would cost you a minor monthly fee. However, a good VPN, besides hulu access, also provides you with much safer internet surfing experience. Most VPNs have great firewall protection and defend your PC against direct virus or hacker attack. That is because the attackers no longer see your IP, but the IP of your VPN, when you land on various web sites.

With a good US based VPN, hulu UK becomes a reality and allows you to enjoy the top shows right from the comfort of your.
