McAfee SAAS and McAfee Professional Services

by Conrad Lara

Article published on March 22nd 2012 | Internet

Managing email and web security are no longer a problem with McAfee SAAS. Corporations can now rely upon a complete set of services based in the cloud.

McAfee SaaS email is the solution for business users looking to move their email to the cloud. Your emails and other communications can be protected with McAfee. Their Cloud based offering does away with installation and managing of hardware.

Enjoy the benefits and features of McAfee email encryption . Your customersâ€™ and employeesâ€™ ema are assured privacy. It protects sensitive information from being exposed to security threats.

McAfee SAAS protects sensitive data from being lost or stolen. The best feature of McAfee is the SaaS (Security-as-a-Service). Customers can now avoid hardware, software, and lengthy contracts. In addition, McAfee offers the flexibility of a monthly subscription model.

Corporations can set up users and policies the way they want to. Individual users and domains can easily be separated. Policies can be applied to the company as a whole and according to requirements.

McAfee Professional Services

McAfee Professional Services provide customers with security assessments, training, deployment and management services for their McAfee deployed solution. They offer detailed and modified deployments.

McAfee professionals provide services for all McAfee products. They are specialized in planning, implementing and supporting its products. They are available to help corporations with all their security needs.

McAfee Professional Services assist customers with training, configuring and troubleshooting services. The professionals provide onsite consulting services. In some locations there are special discounts available to customers.

If a corporation wants to outsource managing McAfee Endpoint, McAfee Email or Web Gateway, the service is available. There are long and short term agreements. Customers may choose from hourly, or 3, 6, or 12 month contracts (for additional cost savings).

McAfee Secure Web Gateway

Companies needing protection against malware can use McAfee Web Gateway. It is a top rated anti-malware for Web 2.0 threats. Let McAfee Web Gateway be your solution against malware.

McAfee Web Gateway will scan web pages content to protect against malicious attacks. Layered security is used to provide advanced protection. Receive additional protection with McAfee virus scanning at the gateway.
