Rapid Thawte Wildcard SSL Certificate

by Daren Bresnen

Article published on May 11th 2012 | Internet

Thawte Wildcard SSL Certificate helps to protect unlimited subdomains with one primary domain certificate. For example, if you have a domain abc.com, any number of subdomains will be protected by a certificate: mail.abc.com, store.abc.com and so on. You do not have to buy a separate certificate for each new subdomain, as is the case with standard certificates. This solution is ideal if you use SSL for multiple subdomains only one certificate to install, and in many cases is more cost effective. Please note that all subdomains must be on the same server.

Thawte Wildcard SSL certificates, you can use IP-addresses of all secondary domain names. The same certificate can be used to secure all subdomains associated with domain names that share a single IP for all subsequent years. You can configure name-based virtual hosts instead of machines.

Reasons for choosing Thawte Wildcard SSL certificate:

â€¢ Encryption strength from 40 to 256 bits, depending on the capabilities of the client browser.

â€¢ Issue in 2 working days, depending on the requirements of the applicant.

â€¢ Widespread is the highest in the browser market.

â€¢ High standards of verification, through the intervention of a trusted third party, for example, Thawte, which guarantees the authenticity of your company and website ownership for certification.

â€¢ Rigorous screening procedures and built-in authentication (domain name and identity verification). Prestige CA (CA) solution.

â€¢ Protocol Secure Socket Layer (SSL), while maintaining the confidentiality of messages exchanged between the server site and its users.

â€¢ Recertification is unlimited for the duration of the certificate.

â€¢ High-strength encryption technology and high reliability of the site to protect the signature of the transaction.

A full guarantee with a name you can trust:

Thawte Wildcard SSL Certificate from Thawte offers comprehensive authentication procedures (verification of identity and domain name). It also offers 256, 128, 56 and 40-bit encryption, depending on the capabilities of the browser and the code set is installed on your server. This ensures that your information is kept private between the Web server and browser client.

Never accept an SSL certificate from a cheaper brand. Thousands of internet users leave websites every day, when they are asked to provide personal information and become uncomfortable. Thawte seal assures your customers to transfer information to your site, so they do not have to click on the certificate to be sure.

Thawte offers a solution for us as one of the busiest and most successful channel partners. This product is a certificate that allows the common name for any server. You will never again be forced to spend significant time and money to install certificates on all the content available on the same

domain. Thawte Wildcard SSL Certificate provides comprehensive coverage at a reasonable price.
