World of Icon Editor by [Meghnath Kumar](#)

Article published on February 25th 2012 | [Internet](#)

Icon editor is programmed to make editing in your own icon system. It permits you to make editing in any icon file, which is actually an image file, with icon extension. It consists of small images with different sizes and colors. What you need to have is a system, or program containing icon replacement function. If you wouldn't have this, your edited files may not be displayed as these are, making your efforts a waste.

Through Icon Editor you can make your own icons for any system you want to use like your iPhones and UNIX/Linux, in PNG format. You can also use this program for Windows, like it can create original window icons (ICO format) of all sizes that have been used in Window Vista, and Window 7 convert. This program can also be used in icon used in Latest Mac OSs "Leopard" and exciting "Snow Leopard" version, like Native MacOS icons (ICN format) with high quality and size.

Icon Editor Program usually hold icon libraries and carry icon, ani, png, xpm, jpg and gif image file design, plus Vista compatible png compressed icons. It is also available to make your web pages attractive, and appealing. It could be seen in browser address bars, book marks, and tabs, mostly with this sign. One important consideration is that, you should save your favicons, in 256- color. It would highly preferable, and don't save in any other type of format, as it would be unseen on any other platform.

Icon Editor Program may have a variety of feature, you would like for yourself that may be support for variable transparency, built-in drop shadow, smoothing, roll, mirror etc, support for multi-layer metaphors, ability to import and export a variety of image formats and batch processing of icons. It is very easy to edit the icons from the <http://www.windows-icon-editor.com/>, one can get different icons of different versions of windows and can also easily edit them.
