Article published on April 19th 2012 | Internet Business

Digital marketing with a WSI franchise is a proven path to an exciting and satisfying career.

Consider it: The division of labor makes modern society possible. Weâ€™d never have all the wonderful diversity of options available to us if we all had to focus on, say, subsistence farming. When one group of people can specialize in one thing, other groups can specialize in others and the choices for everyone begin to multiply.

So how does this apply to you and your digital marketing franchise? Well, not everyone knows how to effectively market their brand online. The web is a place with its own rules and eccentricities, and it takes a genuine expert to be able to navigate the vagaries of this new environment. Further, the Internet behind the web is still a very young technology, barely 30 years old at this point. There are major changes being announced every month.

Consider that the entire dot-com boom-bubble-bust took place largely during the age of dial-up. YouTube wasnâ€™t even an idea at the height of the first major investment wave. Now broadband and online videos are widely available and social media is creating new frontiers in branding and marketing.

Now, imagine becoming an expert in all these things and helping people navigate their businesses to greater success.

You see, wealth isnâ€™t a zero-sum game. It can be used to make more wealth. Your expertise and advice will allow your clients to spend more time working on what theyâ€™re good at in their business. You make money, and the project you provide them allows them to make money. Everyone benefits.

So if you want a career where you can be satisfied both with your own income and financial security AND feel good about helping others achieve their own dreams, then a WSI franchise is definitely the place to look first.
