Reduce tax through relief by [Robert William](#)

Article published on February 13th 2012 | [Investing](#)

Are you burdened with tax? Do you need tax help? Well there are consultants who might help you. There are various ways through which tax can be reduced properly if you allocate your expenses in the right places. Claiming tax relief is easy and with the correct figures, this will bring back the smile back to your face.

We will concentrate on the Indian tax system for now. In this system a tax rebate is available for an applicant. This is a sum which is reduced from the amount of tax. It can be achieved if the amount of arrear salary for more than 12 months is received. Also advance salary will help you in getting the option as well.

The tax help is really important in case you fall within the exemption slot specified by the act. It is better to consult with a consultant who has a good reputation in the field. Remember investing wisely in the correct place will help you in paying the ultimate taxable amount. Claiming tax relief will take the whole thing to the next level.

A relief is available while calculating the deduction of tax of an applicant. This is computed over the annual income of a person and as per the act, the rate of such a deduction is 20%. In most of the countries there is an upper and lower limit for paying taxes. Again some countries have reduced their taxes for senior citizens. In addition to this women also get tax benefits in some countries.

Claiming tax relief is also applicable for another situation. There is a concept called double taxation. In this a situation arises such that the applicant has to pay tax in two different countries. However with agreements between the two specific countries, the amount of tax is collected from one country only. India has such DTA agreements with 79 other countries.

Things are all good up to now. However a newer theory has come up and has started to be used illegally at times. This is called Tax Haven and it helps people by offering nil or low rates of income tax. Some of the countries supporting such fraudulent activities are Mauritius, Cyprus, Panama, and Switzerland. These are considered as tax avoidance programs and once found guilty will result to large amount of fines. However the Income tax department offers tax help in case of discrepancies and instructs people in claiming tax relief, which is helpful.
