Article published on April 30th 2012 | Investing

At a time when I finish playing INVESTMENT en espaÃ±ol INVERSIONES we have forgotten many aspects of the term, The most common is to think financial investments, ie to put our capital stock exchange, since it is the easiest way to invest our money.

At the end of financial success is based where and how we have done investments with our savings. The word investment is the act by which we acquire certain property for the purpose of obtaining an income or income over time.

Here we differ in the act of acquiring, because when it comes to investing our time and our work, our goal would be the same income or revenue; in fact, not only our savings but also to our capabilities as human beings. In fact, in these times we have seen companies come but it was the ingenuity and time spent on developing this idea what is his great success. This is a fact when we look at all these internet based companies.

We must never remove the value our capabilities are, in fact what makes a company to generate high income. When someone takes a job already giving a value to their skills, and what value are our capabilities? is the salary for which we are hiring a business by giving our time .

Unfortunately, in regions of South America we have entered a vicious circle. It began when the low pay discourages the employee's ability. I pay little, little work. This is our final, Now the aim of finding a job is just to receive a salary mediocre and become in turn a workers mediocre.

A job with a company to grow a human, not only materially but also intellectually, so we must see that the or rental income will gain knowledge and skills which you can then realize the investments we are doing with our time.

Not only is capital the essentials to do INVESTMENT en espaÃ±ol INVERSIONES, we need intelligence and skills that can be capitalize. But how to capitalize on my skills? That is where most fail. If you offer are our abilities, we have to value them. How long will it be removed or project work I do? Can I do? Bone if I have the able to do it?. On the other hand, What are my monthly expenses? The project will leave me enough money to cover my expenses and also have a utility? Otherwise we are devaluing our ability.

In conclusion investments we should be looking at further the INVESTMENTS en espaÃ±ol INVERSIONES of are our skills in projects which pays off a high income.
