Article published on January 20th 2012 | Investing

By taking care of the feature â€˜all investments are subject to market risksâ€™, people have gone crazy fo more and more investments. There is a lot said about mutual funds on the business TV and channels, in the newspapers and everywhere. With different kinds of mutual funds available in the markets, people are enjoying their investments. They say some of the best possible investments in markets are available in a country like India. With so many options available for investing, a novice investor may find it a bit confusing as to which mutual fund is the best suited for investing. The fact is all these different kinds of mutual funds offer a perfect platform for the investors to simply pool the cash with a predefined objective of investment. Infact all these different kinds of investments have emerged just to suit the different objectives of investments.

Investing in best mutual funds in India is simple if you keep a note of finest 10 of them!

1.Gold Funds- considered to be one of the safest investments, these gold funds are a boon to invest in to. Surely the investments in to Gold Funds are focused with one single asset, the Gold. As per the gold prices in markets the units of gold funds shift accordingly.

2.Opportunities Funds-compared to other mutual funds, these are a bit different. Opportunities Funds include investment strategies like market timing, events, distress and arbitrage.

3.Close Ended- with a structure based mutual fund like this one, you get a chance to invest as per a specified period of maturity like 5 to 7 years. Investors can exit from these investments by selling back the units.

4.Open Ended- This is one of the commonly practiced mutual fund investments in India wherein the investor can invest or execute in available schemes anytime. There is nothing like an upper limit for the number of shares, investors and fundsâ€™ size.

5.Interval schemes- if you wish to combine features of open ended and closed ended mutual funds, the interval schemes are a perfect choice. Here the units can easily be traded on stock exchange.

6.Equity mutual funds-these are one of the common investments that are classified as per nature wherein the fundâ€™s structure differs for different schemes. With equity mutual funds you can invest in to mid-cap, small-cap, sector-specific and tax-saving funds.

7.Debt mutual funds- are you willing to invest in to guilt funds, income or liquid funds or short term schemes or debt papers? The debt mutual funds are for you!

8.Balance funds- do you wish to invest in to something that combines equity and a debt? Go ahead for the balance funds!

9.Growth schemes- also popular by the name equity schemes, the growth schemes aim to offer capital appreciation within a time period.

10.Income schemes- for availing regular income the investors can go ahead to invest in to these income schemes.

By knowing about all popular mutual funds in India you can invest in to the best ones.
