Custom-Design Sapphire Engagement Ring and Make Her Feel Special

by Vishnu Batwra

Article published on April 5th 2012 | Jewelry

The contemporary fashion jewelry trends appreciate the use of sapphire rings for personal celebrations such as engagements and not follow the traditional trends of diamonds and rubies for these occasions. Sapphires are blessed with blue, yellow, white, pink and many other beautiful colors and an engagement ring carved around these gems are strikingly appealing and elegant as well.

Buying a well-suited sapphire ring is easier these days as many beautiful designs ranging from simple non-fussy ring design to intricately crafted rings are available at leading jewelry stores. These may be bought as pre-set engagement rings or may be made with a ring setting combination and making it with chosen sapphires. But, for a truly unique ring it is suggested that the sapphire ring be personally custom-designed.

Placing an order for personalized custom jewelry is no more an exclusivity of rich and famous, but, may be done by anyone in a few easy steps. The foremost important step is to finalize a beautiful ring design for the occasion. And, it must be unique and breathtakingly beautiful, and completely according to her tastes. Whether she likes it to be subtly elegant or with lots of shine and splendor, or prefers a classic solitaire setting with few diamonds sprinkled around is to be taken care when deciding the design. It is advisable to show her the sketch of the ring before approaching a jeweler since it is for her and she must like it.

Once the image of the sapphire ring is decided, the next very important step is to identify a good jeweler who has the expertise and resources to create your sapphire engagement ring from the beginning. The jeweler needs to understand the exact pattern of the ring and the selection of sapphires and diamonds or any other gemstone if being used. Especially, the carat, clarity, cut and size of the each of the precious stones being crafted on the ring must be clearly laid out in order to avoid any kind of ambiguity. All this information is needed for the jeweler to estimate the final cost of the sapphire ring, which would help in planning the expense of the ring.

Once the cost is approved, the jeweler proceeds to make a wax model of the ring which would give a fair idea of how the final ring will look and also helps in trial-fitting the ring on her finger to check its comfort level. When both these parts are satisfactorily done, the jeweler takes about a couple of weeks to create the ring. And, the sapphire engagement ring is ready to be worn.

A ring thus made would always remain precious to her as it has been thoughtfully designed with carefully chosen gemstones. Also, her personal likes and dislikes with respect to jewelry have been considered. Therefore, it is suggested that instead of buying a pre-set sapphire ring for the occasion some time may be spent to place an order for a one-of-a-kind ring and make the day memorable.
