Article published on May 15th 2012 | Law

Forms play an important role when it comes to medical billing. When you visit a doctorâ€™s office for a procedure, it is quite likely to come across a number of forms which are required for filling. This whole process of form filling is time consuming and hectic. cms 1500 software is the easiest and least expensive way to complete safe, print and electronically file the claim. This software prints the form and data on plain paper or pre-printed Medicare forms. This software can automatically fill the common feed for quick completion. It saves the codes to a list for subsequent use.

Easy to install on multiple computers, this software incurs no additional cost and can generate files for electronic submissions. Through the use of this software, medical professionals can edit patients, insured, providers and carriers information. They can view and edit a patientâ€™s entire history through this advanced software. Highly intuitive and user friendly, it breaks the CMS 1500 form into logical sections and guides you through each screen making it easy to complete the claim form and get paid faster. You can even print image files and can quickly send them for reimbursement to clearing houses using this software.

This software keeps al your forms in one place through the data management tools. The index filling function of this software automatically populates feeds with data such as name, address and birth date with its index feature. Password protection and spell checking are a few features which has made this software the most desired one. This software ensures consistency and reduces the opportunity for errors in data entry and processing. It also allows submitters to exchange electronic data with multiple pairs using the same data format. This software is easy to use and helps in filling up the form exactly in the way as you type it on the screen.
