Article published on January 10th 2012 | Loans

There are several kinds of loans available in the market. People opt for those that allow them to meet their unexpected requirements and are short term without getting involved in any tough situation such as hassles of faxing or excess of paperwork. Mini Text Loans are the most suitable options available for meeting short term fiscal needs at the desired time. These loans do not require the borrower to fax any documents, show his credit history or even pledge any collateral.

With the Mini Text Loans available with almost all kinds of lenders, you can pay off your electricity bill, utility bills, school fees and other expenses without any hassle. You can utilize the amount offered for one week and then repay it with comfort. There are no issues if you want to extend the repayment tenure. The lender would charge a penalty in case you take this call.

These financial resources can be enjoyed during a small term requirement. These loans can also be accessed even when you have worst credit faults including arrears, bankruptcy, insolvency, defaults, IVA late payment, or even skipped payment. By repaying these loans within the stipulated time, you can even turn your bad credit into good credit rating.

In order to apply for mini cash by text, you need to get through a simple registration process. It would not take more than half an hour to fill your particulars in the online form that is provided on the official website of the lender. When the enrollment process is completed, the borrower is provided with a PIN number that is used in the text message sent in order to borrow loans. In the application form, you need to declare the facts regarding certain points that are given below:

Applicantâ€™s age must not be below 18 years. His monthly salary and his residential proof. His job description and his bank account details. After providing all these details, the lender verifies the details and when convinced, sanctions the loan. The loan money is transferred to your bank account within a few hours from the time of application. You can make use of the loan amount the way you want to and where you want to. The best part of this deal is that even the tenants and non home owners are benefited with them as these loans do not require you to pledge any collateral.
