Amazon Gold Ventures Counselling " 2011-2012 Trending Costume Jewelry by [Amazongold Ventures](#)

Article published on January 20th 2012 | [Management](#)

Knowing what is coming up in jewelry developments is vital and then getting able to duplicate the pattern at a fraction of the designer or retail pieces is important. I have visited a number of factories recently and noted some strong trends coming through. Here they are:

Chunky, Remarkable and Large Metals

Huge and bold ornaments are in this time. There is no these issue as "not enough" and "much more" is definitely desirable. Decadently embellished items having drama and generating a main statement will be the showstoppers everyone is hunting to individual. Also enormous metal pieces these as the giant curb link necklace pieces created by Kenneth J. Lane and other individuals and which are really expensive.

Antique, Vintage, Retro & New Combinations

Absolutely everyone loves the look of antique, vintage and retro jewelry and now the most recent trend is to thoughtfully mix these with new and imaginative items for a special one particular of a variety glimpse. Jewelry designers these kinds of as Elizabeth Locke and Roberto Coin are beautifully infusing their new concepts and marrying them to antique and vintage seems to be and the resulting styles are perfection.

Dramatic, Special and Abnormal Necklaces

As opposed to in the previous when the huge brooches and pins have been the key component in one's individual adornment, it is now the necklace. Necklaces that fill a neckline these as the well-known bib design, or the lengthy multi-chain with or without a pendant these as some of the styles by Chopard can include rhinestone crosses, circles, skulls and skeleton keys. Also multi material pieces that appear to be a single-of-a type produce that ever before common "artist -bohemian" search and every single having matching earrings to total the statement is what drama and unique is all about.

Ornamented & Bold Bracelets

This pattern has been scorching for a while considering that Louis Vuitton produced a significant statement with his embellished cuff designs. Also wonderful dyed leather cuffs reminiscent of "surfer chic" with ornamentation are generating their appearance. Substantial Lucite confetti bangles like the old 50's " 60's versions, and metal cuffs with charms, studs and crystals are all bigger than actually.

Eclectic All-natural Ethnic and Tribal Seems

Ethnic and regional styles are often very hot and this year is no exception. Taking from the Native American or African use of normal stones like turquoise, agates, onyx, opaque and semi valuable stones in rock candy colors and like the high stop styles of Oscar Heyman and Katy Briscoe. Beautiful pale angelskin coral and the most critical a single but is valuable and uncommon red coral no matter whether utilized in their raw type or carved are not to be missed. All of this incorporated into authentic nature inspired designs produce an "earth mother" appeal.

Fake & Genuine Pearls

Pearls are pure classicism. For centuries they have been hugely desired for their exclusive one particular of a sort nature. Even so in 2010-2011, pearls are not your momâ€™s string of 8mm pearls any longer. Pearls no matters whether actual or fake are coming in huge rounds, teardrops or Biwa shapes and are exhibiting up all over the place. Even Cartier has revived their classic styling in a lot more eye catching pearl in mixture with diamonds designs. Pearls can be at the finish of an extended neck chain, integrated into a massive hefty metal multi chain bib necklace, on top of a ring, dangling from ears or clustered as charms close to the wrist. They are still feminine but with a â€œwarrior princessâ€• edge.

More than The Best Rings

No matter whether fake or genuine the more one can place on a finger the greater and the notion is to â€œcatch the eyeâ€•. Clusters of crystals, pearls, charms, Lucite beads, reflecting a fashion referred to as â€œFrench Salon Chicâ€•. Flashing an unbelievable ring while getting cocktails and conversation is the ultimate â€œteaseâ€• and every person will be envious.

Huge Hoops and Chandelier Earrings

The hoop earrings is very flexible and this trend is nonetheless quite robust. The biggerâ€™ longerâ€™ and glitzier the far better. Earring Hoops that are 2? â€“ 4? lengthy and have rhinestones or diamonds on the outside and inside of are correct on pattern. Jewelry designers Patricia Locke and Ramona Singer are creating new and fascinating hoop earring designs. Now for a far more elegant appear, chandelier earrings are ideal. Bulgari, and other people are providing their spin on this traditional earring design and style. In 2010, earrings with extreme coloration palettes these as scorching pinks, reds, greens and yellows produce a striking contrast that will give any vogue search a touch of glamour.

Green Eco Conscious Movement

Thank God this movement finally built it to the more than-indulgent earth of jewelry. A lot more and much more designers these kinds of as Mari & Lani Davis, Alex and Ani, and Tamra Gentry just to name a few are concerned withâ€™ recycle and reuseâ€™ philosophies in their styles. No matter whether it is recycling vehicle paint, plastic milk cartons, utilized newspapers, or just plain trashâ€™ fascinating and thrilling jewelry is literally popping up just about everywhere!!
