Modular Clean Room Manufacturer Companies in India by [Sonia Nathani](#)

Article published on July 10th 2012 | [Management](#)

Weiber is a global manufacturer of Modular Clean Rooms in India. We are proud supplier of Clean Room and Contamination control equipments. Our product is available in various sizes that are efficient, durable and versatile at the economical prices to meet the needs. We design and manufacture Modular Clean Rooms for life science, health science, nanotechnology, microelectronics, aerospace, semi-conductor industries as well as other processes that are sensitive to environmental contamination.

Our company is promoted by committed and motivated team of experts with vast experience in the Pharmaceuticals, Biotech, Precision Engineering, Packaging and Micro Electronics industry who are familiar with the changing mode of Clean room Industry.

Clean Rooms are rooms in which the concentration of airborne particles is controlled to specific limits. We aim to provide best quality products, precision clean room installation technical assistance to our customers. Our product is manufactured under strict quality control methods. Also, itâ€™s inspected and examined to identify any contamination before export.

To provide and maintain complete protection from contamination/dust, we follow strict rules and procedures of Federal Standard 209E Clean Room Classification. We have expertise in manufacturing of different clean room classes. We have expertise in ISO certified clean room Class 10 to Class 100,000 clean rooms.

From a Laminar Flow module HEPA filter installation we provide validation documentation to international standards.

Weiber Modular clean room is free standing, rigid wall, and modular pre fabricated clean room system that are designed to provide superior clean room performance with high visual appeal. Clean rooms are maintained at high pressures with respect to adjacent areas that are maintained by rigid walls. This pressure is regulated by wall dampers. We use construction material without any roughness, waviness and pores which retain dust. If more pressure is required for some medical purpose, then some infiltration is reduced. Both factory as well as manual installation is available

Its features include:

Modular and pre fabricated.

Easily and quickly relocated.

Large open spans up to 34 feet

Interior clear height 8-14 feet

Aesthetic designed.

High quality performance.

Easy to assemble.

Expandable and upgradeable.

Single pass or recirculation.

Internal room pressure readjusts to 0.06 in W.C.

Easy Process Integration.

Energy Efficient

Easy to maintain

Full-ceiling HEPA filter

Unidirectional air flow

Versatile Design

Applications:

Animal Housing Labs and Vivariums

CMM (Coordinate Measuring Machines) rooms,

Metrology labs

Gauge rooms

Calibration/quality control areas

Controlled & Critical Environments

Laboratories

Machine Enclosures

Microelectronics Manufacturing

Nano Technology

Oil Mist Enclosures

Packaging Rooms
