Article published on January 31st 2012 | Marketing

Exhibition stand construction is a very popular business. This involves designing structures, analysing them and creating exiting projects. Exhibition Stand construction comprises of feature walls in which the Exhibit Display Stands project elegant partitions, display cases and illuminated walls. Banner or rigid signs can be fixed in a variety of ways, depending on the system preferred. Light boxes and LEDâ€™s can also, be incorporated.

Exhibit Display Stands requires the most important aspect that is external and internal canopies. The rigid structures created by space frame geometry, thus, have to be suitable for carrying overhead glass panels. The methods of support should be versatile too, with columns, wall brackets, tension rods or cables possible in regular or irregular arrangements. Exhibit Display Stands requires reduced ceiling height, overhead lighting or simply to create a focal point in the area. This might be to make an entrance, reception desk, dance floor or seating area. It needs proper designing, planning, control and logistic support.

Dubai Exhibition Stand designers specialize in interactive booth designs that blend with graphics, colors, textures and marketing, that not only, integrates with the ongoing exhibition, but also creates awareness that attracts potential buyers and viewers, both at the same time. Dubai Exhibition Stand Designers take everything into consideration these include:

1. Audio Visual Systems

2. Lighting Systems

3. Furniture to the stand

4. Transportation

5. Insured storage facility

6. Administrative Support
