Enviro safe rerigerantare made up only the purest quality and precisely refined ingredients available today. Unlike other products which are odor carriers which comes obviously to them as they come from unrefined product or additives. Enviro safe refrigerant is as it carries no offensive odor but it can carry a refreshing scent to help you in leak detection process. Mostly, enviro safe refrigerant is quite potent of delivering energy savings and usually results in considerable reductions in operating costs. There are several advantages of using enviro safe as it allows your system to operate with less head pressure and is extremely efficient. There have been documented energy savings of up to 40% over 134a of electricity. Enviro safe carries a guarantee that certifies that refrigerants used in air conditioning, compressors, or other related mechanical equipment when used in accordance with Enviro safe directions, will not harm the equipment physically or by any means.

Enviro safe refrigerant is lighter and more efficient that HFC and CFC products so you use less as 6 oz. of enviro safe is enough to swapa 16oz. of 134a and 18oz. of R12!Enviro-Safeâ„¢ 22a Refrigerant also meets international standards such asâ€”ISO 5149, BS 4434-1995, AS/NZS 1677 and ASHRAE 5149.Enviro safe makes sure that our customers stay happy and laughing all the way to their bank balances. Also enviro safe is a proper r22a refrigerant replacement as this refrigerant is used mainly for home air conditioning units and huge cooling requirements and in turn this is also a great energy saver! According to the analyzed results of a refrigerant enviro safe, air was found to be much colder from the A/C ducts which naturally resulted in shorter run-timesand resulting in efficient and judicious use of electricity as consumption has been reportedly dropped up to the dramatic levels of as much as 40% by simply swapping the enviro safe from R-22.Oz-chill.com offers you the best refrigerants solutions at price so reasonable that you would love to relive the fact that youâ€™re helping environment and yourself every day.
