Article published on May 28th 2012 | Mobile Phones

In the present era of sophisticated technology, 3G mobile handsets have occupied a significant position in the market as well as in the minds of the consumers. With 3G technology, the concept of mobile communication has been revolutionized. Due to this 3G technology, the Latest Mobile Phones enable the user to enjoy many multi-tasking devices. Almost all the leading mobile makers have leave no stone unturned to incorporate the scintillating features of 3G technology in their handsets. If you are looking for a 3G phones, you can go for varied reputed phones such as Nokia, Samsung, Song, HTC, Micromax, Blackberry, Motorola and many more. All these brands have put their best possible efforts to give a classy design and outstanding features to their phones. Some of the latest 3G phones available in the market includes Samsung Galaxy S 3, Nokia Lumia 900, Sony Xperia S and Micromax A73 to name a few.

The 3G phones are featured with lots of innovative applications and tools. The present day 3G phones are attributed with common applications such as self organizer such as calendar, calculator, alarm clock etc. Besides, these gadgets comes with huge megapixel camera accompanied with auto focus, flash and all other essential camera settings, which help the user to take good quality snap and record videos. Apart from HD video and image recording, you will enjoy the functions of geo-tagging, touch focus, face and smile detection and image stabilization. When it comes to music, you can enjoy full music on these devices as these are equipped with advanced versions of MP3 and Mp4 players. Another main USP of these phones is the presence of QWERTY keyboard, which helps the user to handle this very easily. The 3G gadgets also provide you a good battery backup to enjoy longer talk-time and music-play. In terms of connectivity, you can find all the advanced connectivity options such as EDGE, WLAN, Wi-Fi, Bluetooth and USB. Moreover, these phones come with convincing internal memory storage and expandable microSD card options.

It is noteworthy that most of the 3G phones are powered by Android operating systems, which help the user to explore numerous new things. Video calling is another exciting feature of these phones. With 3G phones, you can enjoy video chat with your friends, colleagues and family members at any place and any time. Apart from these, you can access social networking sites, Facebook, twitter and YouTube on these gadgets. Besides, you can have access to Google Search, Maps and Gmail as per your requirements. The user can also enjoy Google Talk on these phones. You can also carry out your official works with Document editor like Word, Excel, PowerPoint and PDF on these handsets. As far as messaging is concerned, you will be provided with the standard options of SMS (threaded view), MMS, Email, Push Mail, IM and RSS. Another notable thing is that these phones come with powerful CPU and advanced GPU. Taking all the modern features of these phones, there is no doubt that Latest 3G Mobile Phone has superseded the market of all previous model mobile phones in the market.
