Talking about various new mobile phones and smart phones in the market have become more or less our forte these days, as this is a field we generally talk about, but even though we have covered most of the new handset in the market in our past few discussions of ours there are still few more which are yet to be discovered by us.

And one of those few new smart phones in the market, we have chosen to talk about today is none other than BlackBerry Curve 9320.

'Blackberry' this is one of those few companies which doesn't require any introduction for itself, as its name is more than enough for any person to know about this company and the various products it has been delivering. Carrying forward its glorious past and best after sale services, this company has again come in the market with a brand new product from its manufacturing house which is known as BlackBerry Curve 9320.

Now, if you are thinking that how can I refer this blackberry mobile phone as one of the best without telling you any of the details of the same, then you don't have to wait any more as below are few of the most basic features this handset is carrying with it self.

Starting with, this new handset from the company is coming with a BlackBerry 7.1 Operating System in it which can be listed as one of the best in the field till date. Also you can find a 3.2 mega pixel camera in it so that you can have a bit of fun with the work. The screen you can find in this new BlackBerry mobile phone is of 2.44 inch that too with a TFT LCD quality, which means you can easily work on this handset without any visual problems.

Storage capacity has become one of the most important quality concern point these days, as it doesn't matter what budget you have decided to spend on a new handset, you can always find a mobile with lots of storage capacity in it. And the same is the case with this new BlackBerry Curve as you can find a storage capacity of 32 GB in this handset which can be enjoyed with the help of an micro SD card. Moving further, there are some of the best features in this handset like FM Radio, GPRS, EDGE Enabled and many more, but to discover all those various features you have to use this handset, as some of the best experience in the world can only be felt.

Moving towards the end, as this BlackBerry Curve is a new handset in the market therefore, it would be difficult for you to have full details about the same at one place. But still for the latest reports related to BlackBerry Curve 9320 price in India you can take help of various online shopping websites.
