HTC Wildfire S - convergence of elegance and technology by Angela Neacsu

Article published on April 2nd 2012 | Mobile Phones

HTC Wildfire S is an outstanding and the most wanted phone amid teenagers and others who are not in a position to buy high end smart phones but want to own a phone with features and applications of a high end phone. In present days people like to stay connected with acquaintances via internet. However being on the laptop or a computer is not essential. All that is required is a good smart phone like HTC Wildfire S. It allows a person to stay in touch with all the friends via integrated social networking sites like Facebook and Twitter

HTC Wildfire S White comes with a large 3.2 inches TFT capacitive touchscreen display with bright and vibrant 256K colors and 320 x 480 pixels resolution besides features like UI auto-rotate, besides touch sensitive controls.

The gadget has a 5 megapixel autofocus camera that comes with LED flash and is competent of taking photos in 2592 x 1944 pixels. You also have the facility of geotagging. The phone is supported by Android OS, v2.3 (Gingerbread) in conjunction with 600 MHz processor. This makes it very efficient while using different applications.

This smart looking handset weighs only 105 gms and has the dimensions of 101.3 mm x 59.4 mm x 12.4mm. It comprises of 512MB RAM together with 512MB ROM. Hence, as a user you are able to save a huge amount of data. The memory can further be enhanced up to 32GB by using SD micro card.

With features such as GPRS, EDGE, 3G and Wi-Fi, a buyer can surf the web at high speed without any break. He can share information or music owing to wireless and fast-connecting 3.0 version Bluetooth. The mobile has an extremely good connectivity. All thanks to microUSB connector which lets the user get connected to the laptop or the computer.

The phone has a battery of roughly 12 hours which means it can be used at a stretch for 12 hrs without having to charge it. MP3 player and FM radio are other features that can be used to listen to music.

This is not all. This smart phone has a satellite navigation gadget. Possessor of the phone has the choice to use various google services and applications for instance google map, gmail and google search etc.
