In this era of modern technology, smart phones have occupied a unique position of their own in the market as well in the minds of the consumers. Of late, Lava has come up with Intel's first Atom-based smartphone called Lava Xolo X900. These Lava phones are in great demand in the market capitalizing on their Lightning Fast Processor. Xolo X900 comes with a 1.6 GHz Intel Atom processor as well as with 1GB RAM. It is to be believed that the XOLO X900 from Lava is the fastest smartphone. These Latest 3G Mobile Phones are powered with Intel patented hyper threading technology and are capable of providing fast web browsing, sophisticated apps and multitasking to the user.

The prime USP of this phone is the presence of excellent camera, which is outfitted with all the attributes of DSLR. The Photo-Burst mode of this phone enables the user to click not less than ten pictures within a fraction of second. Besides, with the assistance of 8 Mega Pixel HD cameras, you are able to enjoy attractive 1080p image and video quality in any condition. The phone is featured with 8 MP rear camera, front camera of 1.3 MP, single LED of flash support as well as with auto focus and touch focus. 8x digital zoom facility is also available on these smartphones. Moreover, these phones are suitable for all who want to enjoy game on their handsets, as these are facilitated with immersive gaming applications. It is really noteworthy that with these phones, you can enjoy stunning HD and 3D gaming experiences. Due to their mesmerizing multi-media functions, these phones can attract the attention of the consumers with great ease.

Backed by 4.03 inch LCD display with a high resolution of 1024X600 pixels, Lava Xolo X900 enables the user to enjoy crisp text and vibrant images. There is also a supportive HDMI output port for TV and dual speakers, which turn the XOLO X 900 into a powerful multimedia device to enjoy our precious moments, live. When it comes to messaging, these phones help the users to enjoy SMS, MMS and Email. All the connectivity devices such as USB, Bluetooth, Wi-Fi, NFC, WLAN support and Modem are available on these smartphones.

The latest smart phones from Lava, Lava Xolo X900 is equipped with a powerful 1460 mAh, 3.7V battery. The battery of these phones ensures a talk-time up to 15.5 hours in case of 2G and 7.8 hours in case of 3G. Consumers are capable of enjoying music playback up to 44 hours as well as video playback up to 6 hours with these Lava phones. Apart from these, these Xolo X900 phones prove a stand-by time up to 14 days. Furthermore, advanced sensors like accelerometer, gyroscope, magnetometer, ambient light sensor and proximity sensor have been loaded on these phones. Powered by Android 2.3 (Gingerbread) OS, these phones come with a display of TFT LCD Capacitive touch with Corning Gorilla Glass protection. For all those who are looking for a new technologically-advanced phone, Lava Xolo X900 has all the potentialities to come up to your expectation level.
