Article published on January 11th 2012 | Mobile Phones

It is very infrequent to come up with some true innovation in the industry of the technology. More frequently, the huge bulk of products being seen are the disparity according to the theme. This is the reason when the things like Motorolaâ€™s Flipout come out, yet if it doesn't transform the humanity around us, the brand needs to be applauded for this great attempt.

The slider smartphone Flipout is the phone that is operational on the operating system of Google's Android however instead of the conventional up and down slider; it makes use of the revolving motion to disclose the keyboard. Design permits phone for being square, building it for the big keyboard at the time of maintaining the tiny complete footprint. The screen is fine and the design is the captivating amalgamation of functional and slender. Square posture of 67 x 67mm with the better than the normal mass of 17mm, which offers it the earlier distinctiveness whilst a pure glass facade, at the back the screen has the brushed metal.

In terms of the build quality, the phone can be rated as being superb with the aforesaid goblet and metal supplementing out a strong feeling alongside plastic put up of chief body presenting no symbols of squeaking of bending. The solitary pivot about which the headset glides too senses enormously muscular without any give. It moreover slithers easily and breaks into lay after you exceed the definite point, building it actually simple to function. Though there's a tad of an education arc to chance the tool and not encompass it soar out of hand, you shortly acquire the hang up of it.

Beneath the screen you will find the trio of normal steering keys you acquire in the Android based devices; Back, Menu, and Home. Others features in the phone are moderately typical additionally with the audio headphone jack up in addition to the power button, left side volume control, right side microUSB and the camera at the rear. The camera works out averagely, the quality of the pics are fine enough. The camera is around 3.1 megapixels. And very pleasantly there is an availability of the option of the self portrait mirror, which is generally overlooked in other cameras. Motorola flipout reviews

Beneath the cover of battery cover, there you will find the 1130mAh battery which provides a fairly good battery backup. You will also find the microSD slot that allows for memory expansion adding up further storage. Phone comes with the 2GB card and the onboard memory is around 150MB. Looking at the specification and the feature you will find Motorola flipout price to be reasonable. The mobile price in India is getting higher and higher day by day, but the Motorola mobile price is exceptional.
