Article published on January 13th 2012 | Mobile Phones

It seems that Motorola has made an entry into the market for the first time; this can be said in regard to their latest launch Motorola RAZR. This is the possibly the best phone in era of smartphone that initiated in the year 2007. The RAZR carries design custom with the waistline of 7.1 mm, and the interesting resources has been used for chassis, as Kevlar. The phone is the GSM version of Verizonâ€™s DROID RAZR; it is similar excluding baseband radio that permits it to work over AT&T & T Mobile in US.

Talking about the design, the Motorola RAZR is the most convincing phone design in the topical memory. It serves as a reminder of the further high-end Motorola smartphones, though it is distinct in itself from others and the credit for this goes to its extraordinary razor slender building and the incline bend. Right from the hit, the thickness of about 0.28 inch makes it the most slender smartphone to be available in the market. Though, it's not consistent for the reason of the hump towards the top where the camera sensors are placed. And to complement its willowy look, it can be regarded as the lightest smartphones of its size and the category. Since it is thin, people start worrying, but you donâ€™t need to worry as it is made of the premium resources. It is strengthened internally through the stainless steel framework complemented with the Kevlar fiber back wrap for strengthening. Truly enough, the device is built most solidly. This Motorola mobile is exceptionally good; you can compare it with several phones that make use of the Size and the Visualization Tool.

The screen is about 4.3 inch qHD that offers the display of 540 x 960 display in addition to the Gorilla Glass being used in the Motorola smartphone, although what's latest is the detail that it facilitates Super AMOLED superior plate in place of the conventional LCD. Freezing colors that are archetypal for Super AMOLED are presented with the RAZR screen also. It is assured that it makes use of the PenTile matrix array, however it's extra competent of fabricating characteristic particulars amid 256 ppi pixel density which, nevertheless, is after those that are imminent Apple iPhone 4S or else GALAXY Nexus that regulate at 326 & 316 correspondingly.

Motorola RAZR reviews exclaims, not astonishingly, we're enthralled by the soaked colors it's proficient to generate, though they emerge a bit garish for several flavors. Toss in its soaring disparity fraction, profound black color, and wide screening angles, further it is very well outfitted in giving up plethora of image luxury to the eyes. At rest, we wish it had higher brightness, especially outside. Motorola RAZR price will definitely sound to be shocking to you.
