Nokia is always engaged in bringing new innovations to the market. One of the elegant handsets from Nokia is the Nokia 603. Nokia 603 has earned great applause from the different corners of the globe. In this era of high sophistication, Nokia has not left behind in providing advanced featured phones to its users. To give a strong stand in the market, Nokia has come up with 603 handsets. In India, these handsets were launched in October, 2011. This latest Nokia Touch Screen Phone is known to be one of the premium gadgets from Nokia.

Nokia 603 is powered by Symbian OS- Symbian Belle. This handset is just another mid range category of phone, which aims at serving the first time smart phone users. Nokia 603 comes with remarkable feature like Near field communication (NFC), which is a much faster mean to connect your handset to other NFC enabled devices. The 1 GHz processor of this phone is effective in working better as compared to Nokia N8. Nokia 603 helps in easy loading the web pages at a much faster speed that helps the user have a smooth browsing experience. The Operating System Symbian Belle swiftly runs on thee handsets. Owing to 1000 NITS output and a low reflection, this phones has a higher than average brightness. Besides, as these phones are featured with ClearBlack tech, you can enjoy fabulous outside visibility. Equipped with 5 mp camera, these handsets provide you a chance to enjoy photography. You can capture every small and big occasions of your life with the camera of these phones.

Nokia 603 comes with their patent Nokia Maps and drive, which helps in providing free navigation for lifelong as well as voice guidance in different countries. The visual display and the sound quality of these phones are quite impressive. These phones are powered by Standard battery, Li-Ion (BP-3L), which ensures an excellent talk-time up to 16 h in case of 2G and 7 in 3G. Acclaimed for their elegant and fascinating design, you can avail Nokia 603 in black/ white front, with swappable rear covers in six vibrant colors such as Black, white (front panel)/ black, white, fuchsia, green, yellow and blue (back panel). The 3.5- inches IPS-LCD screen of these handsets sport 360x640 pixels of resolution. You will find this device to be very sleek with a 12.7 mm thickness and its weight is just 109g. The tapered edges of these handsets are instrumental in adding a finished look to it. It is expected that this handset is going to captivate the attention of the buyers mainly youths. All the accessories such as spare color back cover, in-ear headphones, wall charger, microUSB cable, Warranty and information leaflets are provided with these handsets.

According to Nokia Mobile Phones Price in India, Nokia 603 is placed at INR 14,460 (approx). The price of these phones is considered to be quite reasonable considering their features and specifications. Apart from stylish designs and advanced features, these handsets are highly admired for their user-friendliness.
