Nokia Lumia 800: Just a touch away! by Stephen Woods

Article published on March 15th 2012 | Mobile Phones

Nokia Lumia 8000 belongs to new range of Smartphones which is backed with touch screen controls. The handset comprises of wide selection of communication, entertainment and multimedia features. The users can choose their Lumia 800 from 3 color choices namely cyan, black and magenta. The handset works well on Windows Phone 7.5 Mango Operating System which gives metro user-interface with live tiles format. The mobile phone is easy to use and operate as measures 116.5 x 61.2 x 12.1mm and weighs 142 grams with fitted battery.

The wide 3.7 inches AMOLED capacitive curved glass touch screen gives high viewing experience to its users. The Gorilla Glass display is backed with latest Nokia ClearBlack technology which gives crystal clear images at a resolution of 480 x 800. The touch sensitive controls are a big bonus to the users as with just a click, they can access varied features.

While talking about Nokia Lumia 800, it is totally unfair if imaging features are not discussed. For photo and video capturing, integrated 8 megapixel camera can be used and it is backed with user-friendly imaging options. The camera supports Carl Zeiss optics which is known for utmost clarity. For better capturing, the users can best use features like Dual LED Flash, Touch Focus, continuous auto focus, 3 x digital zoom, red eye reduction, geo tagging, HD video recorder, 3x video zoom, video setting, streaming, player and so on. The users can download the games from internet and enjoy touch screen gaming.

With option of advanced messaging, you can send or receive SMS, MMS, instant Messaging, Push Email to Yahoo, Gmail, Hotmail and Windows Live, and attaching Email. The built in FM radio RDS and music player comes complete with speaker sound option. The handset provides opportunity to record your favorite song, information, etc from FM. You can enjoy listening to favorite music for up to fifty five hours and watching videos for up to 7 hours when the battery is fully charged battery.

The Nokia Lumia 800 supports 16 GB of internal memory which gives ample storage space. The GSM quad band and 3G network Smartphone offers advanced technologies which include Wi-Fi connectivity, EDGE, Micro USB connection port & Bluetooth wireless technology. The assisted GPS navigation function guides its user in unknown destination.
