Article published on May 31st 2012 | Mobile Phones

At present, every single day you will hear about the launch of a new cell phone in the market. The launch of more and more new cell phones in the market has increased your cravings to get the latest gadget available in the market. Each newly unveiled mobile device carries something new or unique attributes that can attract the minds of the consumers. All these Latest Mobile Phones are designed employing contemporary technology. Whether its Samsung, Sony, Nokia or Blackberry, everyone is launching their latest handsets in the market. One of the latest phones launched from Samsung is the Samsung Galaxy S 3. Similarly, Sony has produced a new phone called Xperia U. To gain an edge over its counterparts, Nokia has developed a new device called Nokia 808 PureView. Likewise, Blackberry has launched a latest handset named BlackBerry Curve 9320.

Samsung Galaxy S 3 is equipped with all the fascinating features such as Corning Gorilla Glass 2 protection, Super AMOLED capacitive touchscreen with 16M colors and an internal memory of 16/32/64 GB storage, 1 GB RAM. These handsets have greatly been in talk even prior to its release. Besides, these phones come with not only 3G but 4G network also. Powered by a CPU of Quad-core 1.4 GHz Cortex-A9, this device definitely delivers excellent performance. With all Social networking integration facilities and Document editor like Word, Excel, PowerPoint & PDF, you can stay active both with your social and professional life.

Sony Xperia U is another new handset from Sony. This phone had gained immense popularity in the market owing to its convincing features. Provided with Sony 3D surround sound audio technology, this gadget enables the user to enjoy good quality sound. The internal memory of this phone is also quite decent which is 8 GB, 512 MB RAM. It helps you to store your data conveniently. As far as connectivity is concerned, you will find all the standard connectivity options such as USB, WLAN, GPRS and EDGE installed on these phones.

Nokia has released its 808 PureView, which has been acclaimed in the market leveraging on its 41 MP camera along-with additional features such as Carl Zeiss optics, autofocus and Xenon flash. Besides, the camera of these phones also features 1/1.2" sensor size, ND filter, up to 4x lossless digital zoom, geo-tagging and face detection. In terms of internal memory, the phone is fair enough as it possesses 16 GB storage, 1 GB ROM and 512 MB RAM. The sound quality is pretty impressive as it is loaded with Dolby Digital Plus and Dolby headphone enhancement.

Now letâ€™s come to BlackBerry Curve 9320. The phone has all the basic potentialities to give a stand in the market. Fuelled by OS of BlackBerry OS 7.1, you will enjoy this phone pretty much. Light in weight, this phone is attractive in terms of appearance. Equipped with QWERTY keyboard, you are going to enjoy smooth and fast typing of test on these gadgets. You will also be satisfied with the talk-time as it provides you to enjoy uninterrupted talking up to 7 hours and 30 hours music play as well.

If you are thinking about the prices of these phones, then as per Latest Mobile Phones Price in India, the above mentioned phones are quite reasonably priced taking into consideration the features and specifications of these gadgets. There is no doubt that the latest phones from these brands will serve your requirements and define your style statement too.
