Samsung Galaxy W Price by Jameskenrich

Article published on January 10th 2012 | Mobile Phones

If you are thinking of a serious mobile purchase, then suddenly you can have a viable option such as the new Samsung Galaxy W price. Samsung's Galaxy W is a pre-requisite FCC debut, along with brandishing radios fit for AT&T. Else than its superb and gleaming looks, this mobile phone has a lot to unfold when it comes to 4G Android device and it's purported 1.4GHz processor up for sale.

The Samsung Galaxy W is also reckoned as a cheaper variant of the earlier introduced model of Samsung Galaxy S. Far cheaper then the iPhone 4 , this mobile phone easily matches all the type of users when it comes to sheer grunt. Talking about its technical enrichments, this is certainly no disappointments for those who are perfectionists in their work on go. It has got to feature 1.4GHz single core Qualcomm Snapdragon MSM8255T chipset which is considered to be far more powerful than the A4 on the iPhone 4. Certainly you can make out what makes its stand far ahead than other costly yet less competent mobile phones already launched in the market.

This exclusive Samsung Galaxy mobile phone has startled the market users with its breathtaking looks and fabulous features. Taking the discussion further is the presence of five megapixel rear camera with a front facing VGA one along with the pre-decided 512MB RAM and 2GB onboard storage. You will also be getting a microSD card reader and a 1500mAh battery support that supports you to enjoy long hours of functioning on this highly stylish mobile phone model.

If you are concerned about its connectivity, the Galaxy W endows you the favoured connectivity options like USB 2.0, Wi-Fi and Bluetooth. The fabulous functioning platform is all based on the Android OS 2.3 Gingerbread technology. For tech-freaks, it has few other goodies courtesy inclusive of Samsung's own TouchWiz user interface. It is imbibed with few Social, Music and Game applications that makes it a [perfect pass time for you if you remain on the go every now and then.

Ho,ding and performing operations with it is a real treat. It is 11.5 mm thick but not as slim as to get lost in your pocket. It is visible enough to mark its long lasting presence on the mind of users. Certainly functioning at par with Samsung Galaxy S2 or the Motorola Razr, it costs less than half the price of both. Samsung Galaxy W price has been counted among the most nominally priced mobile phone which has gained a great market share.
