Samsung I9100 Galaxy S2 price - Great Mobile Experience by [Jameskenrich](#)

Article published on January 25th 2012 | [Mobile Phones](#)

When it comes to high end smart phones, Samsung has left other mobile manufacturers far behind. This company has given excellent smart phones to the users recently. After the successful launch of Samsung Galaxy S Samsung has come up with yet another superb model in the same series titled Samsung I9100 Galaxy S2. The previous version proudly boasted of its main four features the powerful processor, the huge AMOLED screen, the 720FPS video recording and the latest Android software.

The Galaxy S2 is just a super presentation of these key features. The screen is AMOLED plus that looks stunning, the powerful dual-core processor has enhanced the speed of the processor to its new heights one can now experience a smooth and silky web browsing experience through this high speed processor nevertheless the enhanced media features requires the same applaud.

In its quench of achieving the best by keeping the requirement of the users in the back of the mind Samsung has done a commendable job in its latest Samsung galaxy S2 smart phone. The presence of LED flash to the camera and the 8MP sounds shows that they mean business. The complete HD videos are indeed impressive. Samsung I9100 Galaxy S2 model though appears slightly bigger in size as compared to its predecessor but it is slimmer and lighter in weight. This model is presented with 3mm extra length and 2mm extra width but then with excellent interiors and huge screen this is addition in size it just negligible.

Thanks to its weight at 116grams it is almost 3grams lesser than the previous model. The galaxy S2 has one more attractive and unusual feature that is its textured battery cover surface which enhances its matured look and at the same time makes it more durable. Samsung Galaxy S2 has a promising touch screen that showcases 16 million colors. Users can enjoy the USB on-the-go and TV out port. The wide screen enables display of full 160 words text matter and long e-mails at just one instance. No need of scrolling up and down for reading those long SMS and e-mails. It can be termed as a pocket PC because it is backed by dual-core 1.2GHz A9 processor and 1GB RAM. ANDROID Gingerbread operating software makes it more user- friendly.

Internet can be accessed at a lighting speed through 3G connection at a super speed of up to 21Mbps. No more of slow and irritating speed that you experienced with those GPRS connections. With Samsung Galaxy S2 now you can experience an incredible internet speed. Incorporation of Adobe Flash 10.1 is an added benefit for its internet browser. This model is a high end smart phone and therefore priced reasonably at the range of Rs 28,000-30,000.
