Smartphones: a must have all in Gadget by Sushant-tech

Article published on May 25th 2012 | Mobile Phones

Itâ€™s the season for the Latest Mobile Phones with various companies engaged in launching improved and newer versions of handsets. At one point of time, these mobile phones were better known for making calls and sending texts. But in last few years, the conventional method of communication and interaction has changed with the onset of modern science and latest technologies. With each passing day, more and more advanced versions of better handsets have cropped in the market. Even time came, when we used to carve for those multimedia handsets that had become rage among the youths. These newly developed multimedia mobile phones used to have decent camera and even let the users to play their favorite tracks. As the time passed and with the advancement in the technology, mobile makers came forward with the all new next generations handsets, known as Smartphones. These revamped and improved versions of mobile phones are way different from the conventional multimedia handsets.

Multimedia phones are better known as a mid-stage device in the evolution of smartphones. Yes, the development of multimedia phones gave the manufacturers an insight to come up with the more advanced and full-featured mobile phones. Smartphone is a next generation communication device, which is loaded with some of the coolest and latest features. These all new handsets are provided with high speed internet connectivity, Wi-Fi, high resolution camera, large display with touchscreen, QWERTY keypad, good operating system, excellent video recording, GPS, office organizer, high-definition games, music & video applications and tons of other widgets. Back in 90â€™s, did you ever thought of making video calls from you multimedia phones? With the smartphones, your imagination of making video calls has also come true. Users have the options like secondary camera in their latest phones, which allow them to make calls while seeing their loved ones in any part of the world.

Now the question arises, what does these smartphones cost? There are various smartphones that have flooded the market. Brands like Samsung, Nokia, LG, Apple, HTC, Sony, BlackBerry, Motorola, Micromax, Spice and Karboon make some of the best smartphones for the consumers. Apart from these companies, there are numerous other local and international mobile makers that are also engaged in providing the consumers with affordable and fully-loaded smartphones. From Flagship models to affordable handsets, mobile companies develop each handset keeping in mind the earning power of the consumers.

One of the latest handset, which is gathering all the attention of the press, consumers and tech-freaks, is ViewPhone3. Coming from the leader of visual display products and consumer electronics, ViewSonic, this smartphone runs of an improved version of Android 2.3 (Gingerbread) operating system and powered Qualcomm 7227T 800MHz processor. A dual-SIM smartphone, it allows you to manage both professional and personal life. ViewPhone3 is not just a communication device, it is integrated with 5MP auto-focus camera and have 3.5 inches capacitive multi-touch LED screen. This mobile phone has been designed keeping in mind the mid-income consumers, giving them the leverage to feel and experience the Latest Smart Phones and at price which they can afford.
