Recently, Sony has announced a new handset named Sony Xperia neo L. To gain edge over its counterparts, Sony has come up with these handsets, which are equipped with all the sophisticated features of present day mobile phones. It is worth mentioning that Sony has always been a trustworthy name among the consumers for providing superior quality gadgets. These phones are expected to do formidable business position in the market. Yet to be released, these phones are loaded with 1 GB storage and 512 MB RAM. You can enjoy smooth and fast typing with these handsets as these are provided with QWERTY keyboard. These latest gadgets also come with an up-graded version of OS called Android OS, v4.0.3 (Ice Cream Sandwich).

The Xperia neo L comes with a chipset of Qualcomm Snapdragon and a CPU of 1 GHz Scorpion. Besides, these handsets are provided with a GPU of Adreno 205 and sensors like proximity, accelerometer and compass. If you are thinking about messaging, then you can just relax because these handsets are provided with SMS (threaded view), MMS, Email, IM and Push Email options. Sporting a camera of 5 MP, 2592Ñ…1944 pixels, autofocus and LED flash, these handsets also come with additional features that include video calling, touch focus and geo-tagging. You can also immensely enjoy high definition videos with 720p@30fps and video light. A consumer can avail these gadgets in black and white colors as per his/her choice and taste. In addition, these Sony devices are powered by Standard battery, Li-Po 1500 mAh, and these phones ensure a talk-time of 7 hours 53 minutes in terms of 2G and up to 7 hours 9 minutes in 3G. You can also enjoy music-play up to 37 hours. HTML5 and Adobe Flash browsers have been installed on these handsets. Moreover, these handsets are installed with Timescape UI multi-touch technology, you can enjoy multiple touch up to four fingers on these handsets.

The new Sony gadgets are installed with a LED-backlit LCD, capacitive touchscreen and 16M colors. These handsets have a display bearing a size of 480 x 854 pixels and 4.0 inches. You can also comfortably carry these gadgets with you to anywhere as these are slim and light in weight. According to Latest Mobile Phones News, Xperia neo L phones have very fascinating appearance and are simply superb as far as performance is concerned. However, there is one major disadvantage in these handsets. You will find any Radio on these devices for entertainment purpose. Other common applications available on handsets include SNS integration, MP4, WMV, MP3 WMA, WAV player and TrackID music recognition. Apart from these, you will enjoy multiple tools such as document viewer, organizer, voice memo/dial/commands and predictive text input. Furthermore, upgraded versions of GPRS, EDGE, Wi-Fi, Bluetooth and USB have been loaded on these gadgets. Expectations are also there that these phones will be placed at reasonable prices. You will obviously find this latest Sony gadget to be of great utility and this handset can redefine your style statement.
