The Long Lasting Battery of Apple iPhone 4S by John Henry

Article published on July 25th 2012 | Mobile Phones

Almost all the stylish handsets do not survive for a long time period without being charged. And after the launch of an iphone 4S questions are arising whether this handset battery would prove to be long lasting or not? So an experiment was done with this handset by employing the handset from the normal to the heavy usage. It was alternating Web browsing over both 3G and Wi-Fi, brightness was tuned to full, about 50 minutes was spent in streaming You Tube, little time was spent in downloading and even playing games and performing.

All these tasks the battery of iphone 4S ran downwards just 27 percent from the fully charging gadget after 6 hours and 18 minutes. By this a conclusion was made that using the smart for a whole day would not end up the battery and the smart phone would continue working for long hours. Also if you assumed that the battery would go to drain very quickly then you may do one thing that turn off the services that are not in use and also check in the setting menu that which apps are monitoring in your locality as all this might guzzle your services.

In the other trial the iphone 4S burned up very quickly operating graphically intensive 3D games Infinity Blade and Real Racing 2. And it was noticed that the battery did not last more than 3 hours and it was considered to be the estimated least amount life expectation. Moreover the processor of iphone 4S worked very hard the smart phone warm up at the same time when it was operating these games.

The results of the iphone 4S are up to our expectations but the mobile admirers are still waiting for the high featured handset whose battery could last for two or three days. Also this iphone 4S has to be charged every night so that it works for a whole day without getting stopped especially when you are fond of playing high powered games or downloading. Through this we come to know that the battery of the iphone 4s is very much similar to the iphone 4. The smart phone possesses all the features which would keep Apple at the top position.
