Tips to Save Money on International Calls from UK by [Ava Jackson](#)

Article published on December 29th 2011 | [Mobile Phones](#)

Many of us have friends or relatives living abroad. Recent call, the cost of international calls and it is meant for special occasions. However, Skype's video calls, free calls can be made now.

Skype, which was recently acquired by Microsoft, is a leader in international calling. Since 2001, Skype has grown more than 500 million subscribers. The increasing popularity of VoIP technology led Google to install Google chat application built into your email program. Now you can make free calls to anyone in the India, USA Pakistan from your computer when you are anywhere in the world.

If you're like most people, who are always on the lookout for financial bids, then you have to use a look at this offer. For only \$ 10 a month you can have unlimited international calls to over 40 countries to do. This is more favorable than those offered by O2 mobile. Your O2 International favorites Deal allows you to call numbers 3 for £ 10 a month. And there are limits to that of 3000 minutes. With this new service you can add as many numbers as you call in 40 countries without these additional costs.

Before VoIP, the business card was the only way to save money on international calls. Calls are routed through a cheaper telecom provider. Sometimes the quality of the connection would be a little suspect, but overall the amount of money you have saved, the lack of quality would be insignificant.

Other ways to make cheaper calls is to use a phone number. When dialing a number that will save you a connection to another telephone network, a significant amount in the long run, especially if you choose from a landline. If the cost, for example to India directly from a BT landline is said of 20 cents per minute if you select 0844 474 5252 cost only 5 cents per minute.

If I wanted to call the U.S. from UK, it would be 10 cents per minute, but again cost if you chose 474 0844 5252 then it would cost 5 pence per minute.

With the development of the Internet, VoIP has allowed families to help them keep in touch despite the great geographical distance between them. In my opinion, Skype is the best way for very cheap international calls. With Skype you can make in anyone at any time.

Free international calls is easy if you how. Take out O2 international calls or Orange international calls know if you have an O2 and Orange mobile phone.
