Dare to Experience the Difference with Vinyl Records by Seth Frank

Article published on May 4th 2012 | Music

There are many ways you can enjoy your favorite musicians, but when it comes to really appreciating the art form, there really isn't a better way to do so than on vinyl. Sure it's not as convenient as digital music, but there is something to be said for vinyl, and what it represents in the world of music. Even though the format is over fifty years old, there is such a strong and loyal following for it that it goes to show that there is something to it that cannot be replicated or improved upon.

Listening to vinyl is more than just that; it's an experience. From the second you pull the record from its sleeve, you've put it all into motion. Placing the record on the turntable and lifting the arm of the needle, resting it gently on the face of the record. You start to hear the familiar crackle as the first track starts to play, watching the record spin and hearing your selection in a way that is unmatched in any other medium.

No matter what kind of music you are into, there is something that you can only find on vinyl, and even though the format is somewhat dated, you can still find LP records featuring any of your favorite musicians, from the present or the past. It could be something like Beatles vinyl records, for example. You might be surprised to find just how many artists are available on vinyl. From classic rock and roll to modern hip hop and even techno, you can find just about anything on vinyl.

Some people might have thought that vinyl was only used by DJs in this modern age of music, but it goes far beyond that, and any true music enthusiast will tell you that vinyl is the preferred method of enjoying their favorite artists over all else.

Though the format has not changed much over the years, you can find modern high end VPI turntables that are far more accommodating than those of the past, taking up less space and offering a sleeker, more stylized look that also makes having a record player in your home more appealing. Not only will you be able to play your favorite music, but you can also look cool doing it.

Though trends come and go, vinyl has stood the test of time, and won't be going anywhere anytime soon, so if you consider yourself a music lover, it may be about time that you turned to vinyl, and expanded your appreciation for the art form.
