Article published on February 17th 2012 | Music

Whether you are a serious vinyl LP collector, or simply holding on to old vinyls that have special meaning to you, you will want to keep them safe, and your turntable in good working condition. LP records are not only precious possessions, but can be very valuable. This is why you should keep them as safe as possible. Keeping them protected doesnâ€™t have to cost a ton. There are a few affordable ways that you can keep them guarded and safe. You can protect your memories and your investment in records by keeping them safe.

Inner sleeves are the most crucial in protecting and preserving. Pick plastic over paper when you buy inner liners. Plastic keeps both dust and pressure from the LP because of its thin material. Without an inner sleeve, LPâ€™s can easily become scratched, and suffer from the atmosphere. Vinyl needs protecting from dust, pollen, and even pet dander. Anything floating around in the air can cause harm to your records. Plastic sleeves are the best way you can affordably protect your records and keep them in top condition.

Album covers are just as important to protect as the vinyl itself. Album covers feature great art and can be very valuable all on their own. This is why you should also keep them protected. Without an outer sleeve, an LP cover can easily get damaged. This will protect it from mold, split seams, and fading artwork. You can get outer covers that are open-ended and re-sealable. Open-ended sleeves are often best because they are thicker. Like inner sleeves, these liners protect your cover from environmental damage, leaving your oldest LP covers in perfect condition.

You should also consider a cabinet or shelves that are especially for vinyl albums. Custom album cabinets can be made by manufacturers to hold and store just a few albums or hundreds of them. Shelves are another good option. You will see how album shelves are similar to bookcases. You should use either of these options instead of boxes. This is the easiest way to sort through your records and see what you have. This is well worth the investment for any collector.

As a professional record collector or just a fan of music, it will be crucial that you keep your vinyl collection protected. The Beatles vinyl albums or Jimi Hendrix vinyl you have had for years could be worth a lot of money. With plastic inner liners and outer covers, your vinyl records will remain safe from any exterior environmental damage. You donâ€™t have to spend a lot of money on storing and guarding these special albums. A minimal investment can turn into a bunch of money.
