Is it Possible to Learn Piano Through Piano Software?

by Dan Counts

Article published on April 20th 2012 | Music

Have you ever wondered what it would be like to play the piano or improve your skills as a pianist? There is more than one way to learn piano. You could learn in a class with several other students or utilize one-on-one instruction with a teacher. These standard methods of learning may or may not be convenient with your busy schedule, pace of learning, or your pocket book. One option that is often overlooked is to use piano software to help you learn to play piano.

Piano software can vary by cost, features, and technological compatibility with your current computer hardware, but most of them will allow you to learn to play the piano. Here are some of the other reasons why it makes sense to choose to learn with help from piano software:

- Learn lessons at your own convenience

- Choose the pace of learning

- Save money

- Use it for practice sessions

Thanks to the internet, there are plenty of resources for people looking to buy piano software. Some of these, such as Song Robot Software, offer a complete guide along with videos. While not all music software can do the following, Song Robot Software can:

- Slow down songs.

- Transpose songs to all 12 keys.

- Learn with red colored notes or on a 3D version of a piano.

- Stop, pause, rewind, or fast forward.

- Load your favorite audio files (mp3/wav files) and have it remove vocals.

- Solo/mute/visualize each track and more.

Before you choose to buy any software to play piano, here are a few things that you ought to keep in mind:

- Features: This is the most important factor when deciding to buy the software. Features such as video tutorials, help through online forums, printable worksheets, play-along tracks etc.

- Ability Level: Before buying software, ensure that they are right for your level. For instance, if you are a beginner, you will need software that is meant for those who are just learning to play. Is there different software for intermediate levels and more experienced musicians? Needless to say, your level of expertise would determine the software that you would need.

- Practice Tools: Some common practice tools include accompaniment, tempo adjustment, metronome, multi-track audio, practice instructions, interactive games, etc.

- Help: This is also an important aspect, especially if you are a beginner and you have a question. Is there a support desk to help you solve the issue that is preventing you from success? Who do you contact if the software has developed a problem?

Playing piano can be educational, fun, and help you to expand your horizons. Go ahead, you can do it!
