How to convert PDF to ePub format for iPad, iPhone, iPod? by [Lisaleger](#)

Article published on May 11th 2012 | [Networks](#)

iPad is an eReader with its attractive e-reader app called iBooks, which provides wonderful reading experience for all iPad users and a source of envy for others. iBooks uses ePub as its core format-if you already have many eBooks in PDF format on your Mac, just convert eBooks from PDF to EPUB format and sync them to iPad.

Using an efficient mac converter application called PDF to Epub Converter Mac, you can quickly convert PDF to .epub files, which you can then transfer to your iPad for reading in iBooks app.

With Mac PDF to EPUB Converter everyone can write an e-book with full control over how it will look on Mac OS X. All you need is to add your PDF files to the program and click "Convert" to convert an PDF file to ePub to read in iBooks app on iPad, iPhone 4, iPod Touch, etc.

With this tool users have immediate feedback about how their ePub format e-book will look like. Mac PDF to EPUB Converter give their users options to customize the output ePub documents.

Although there are many eBook formats, in the existing multimedia world, PDF and ePub have grown to become the crucial eBook formats that may be accepted by most widely utilized eBook reader devices which include iPad, iPhone, iPod, Sony Reader, Amazon Kindle3, and Barnes and Noble Nook, and so on.

ePub eBook whose text display could be optimized for the certain display device utilized by the reader will allow its reader reading eBooks of this sort conveniently with the full-page shown on the player's screen. On this aspect, PDF eBook has its own weakness, although PDF eBook's accuracy and coherence of layout and text can't be denied, eBook with PDF format usually can not be totally displayed on the player's screen.

No it does not take 30 seconds, Calibre hates images in PDFs and usually can't convert them, also if your PDF is not a nicely written or is a scan of a book it usually can't convert it well and when imported to iBooks it lags and feels buggy. If you like your PDFs get for 99c or comic reader mobi for 13 bucks.

Preserve formatting when converted to epub. I have a huge collection of Pdfs that are valuable to me and I would take the time to convert. I really don't see how it would be all that time consuming anyway. I'm sure batch converting would be a possibility. I just don't know my way around ebook software. There is no need to be a jerk.

No it does not take 30 seconds, Calibre hates images in PDFs and usually can't convert them, also if your PDF is not a nicely written or is a scan of a book it usually can't convert it well and when imported to iBooks it lags and feels buggy. If you like your PDFs get for 99c or comic reader mobi for 13 bucks.

Using an effective mac converter application referred to as PDF to Epub Converter Mac, you are able to quickly convert PDF to .epub files, which you could then transfer to your iPad for reading in iBooks app.
