Article published on November 30th 2011 | Others

With years of experience installing and maintaining a variety of different electrical systems, Roberts Electricalâ€™s team members are the electricians Oxford trusts.

Our high-quality engineers have amassed a vast amount of experience through dealing with all areas of electrical work. From simple jobs like changing domestic light fittings, to large Â£100,000 commercial installations, our team has a proven ability to deal with any task. Weâ€™re flexible enough to tailor our services to the needs of every customer and their system, be it fire alarms, telephone systems, lighting systems, TV aerials and satellites. Weâ€™ll also provide testing and maintenance to keep your systems fully functional.

You can benefit from expert advice from some of the best-trained electricians Oxford has to offer with our free quotations. Our aim is always to get the job done with the minimum of fuss and disruption, working to a schedule to suit you, and keeping you in the loop every step of the way. Our professional service extends to our fast-response emergency call-out service. Members of the NICEIC since 2004, we are the electricians Oxford can rely on. We are dedicated to offering excellent customer service in order to achieve complete customer satisfaction, and this is why we strive to deliver a consistently high standard of work in all our services.

Domestic

When it comes to your home and your family, the safety, reliability and energy efficiency of your electrical systems are the top priorities. Our engineers can deal with all electrical aspects of a home, from maintenance and upgrades to new builds, from re-wiring a light socket to re-wiring a whole house. And because few things are more distressing or inconvenient than an electrical emergency in your home, we offer a fast call-out service to provide you with peace of mind.

Our skilled and experienced team can deal with all manner of domestic electrical installations, from lighting and telephone systems to TV aerials and AV installations. We use the very latest innovations in the field to save you money and ensure reliability and durability.

Commercial

Our engineers are experienced in all aspects of commercial electrical systems and installations. This means that we understand the needs and priorities of business when it comes to electricity: the importance of customer and worker safety and comfort, the inconvenience and lost income when a problem arises. We can carry out the regular testing that commercial premisesâ€™ electrical systems require to ensure that they stay safe and in working order, and meet health and safety requirements.

Maintenance is important, as dangerous faults can easily go undetected. We can also provide inspection and testing for landlords, and issue the relevant certification for all your electrical installations and devices, emergency lighting, and domestic smoke detection systems.

Whatever your needs, our team will work closely with you to get the job done quickly, expertly and with a minimum of fuss, to a schedule that suits you. All of our services are offered at competitive prices, allowing you to test your electrical systems cost-effectiv
