Few Interesting Features about Smartphone Setup by Stuart Owens

Article published on March 30th 2012 | Others

Today most people are excited about buying smart phones. Smart phones are more advanced than the mobile phones which include many interesting features that attract young and old. At the first instance, smart phones have a very good sound and picture quality. It allows you to store movies and videos of your choice and watch them whenever you want. You can connect to facebook and twitter through internet. Also, you can take pictures and videos and as well share it with your friends and family. With many additional features, it makes it very interesting to carry a smart phone in our hand.

Smart phones carry plenty of accessories, which make it very attractive. However, Smart phones are very delicate compared to the mobile phones. Hence it is always good to keep it safe inside a cover. Especially, if a smart phone carries a glass screen, then obviously we need to understand that it is fragile. Therefore, we need to handle the same with care. When we buy a cover, we need to ensure that the corners are completely cover, the reason being, the edge having more impacts that could break the glass.

When you buy a smart phone, the kit would contain a headset as well. At least a headphone is a necessary for a smart phone even if you donâ€™t have micro phone. One of the advantages of having a smart phone is its storage space. Most people use smart phones to browse through the net, making a call, downloading pictures, music, movies and so on. All these can be done on a mobile phone as well. However, when a mobile has all these facilities, a question may arise in our minds. Why do we require a smart phone then?

The answer to this question is quite simple.

â€¢The quality that we experience on a smart phone cannot be matched with a mobile phone.

â€¢Smart phone has many additional features that normal phones not have.

â€¢The storage capacity in a smart phone is more than that of the other.

â€¢Surfing through the internet, using facebook and twitter is easy in a smart phone

â€¢

Likewise there are many other interesting features that we will be excited about, especially if we are using a smart phone for the first time. Let us look at some of the interesting features that we can use on our smart phones. Storing contacts in your smart phone quite simple and all you need to do is transfer the names while upgrading your phone. Your Smartphone Setup should be appropriate when you need to email your friends. Setting up your email would vary depending on your smart phone. Even the Gmail setup is quite different. There are set of thumb rules that we need to remember while setting up an email.

Apart from sending emails you can also set your calendars. For example, Android phones synchronize with Gmail accountâ€™s calendars quite easily. You can also convert videos or home videos over to your smart phones. However, you need to down sample such videos.

Today, most of us are aware Apps. Smart phones are not smart without apps. Every smart phone platform has an appropriate app storefront. The apps features differ based on the model and type of

smart phone. The apps used in and iPhone is considered the best. Therefore, it is considered a bit expensive than the others. The Android is considered the second best of all. Through this you can get the latest updates in the market. Blackberries are considered the biggest additions to the apps world. Apart from these you also have Palm and the Window Mobile.
