Vapor E Cig: a new system of self-control by Corwin Smith

Article published on March 12th 2012 | Others

The industrial revolution has completely changed the lifestyle of the whole planet completely. People have become addicted to many different substances in the world which the body cannot give up with mere will power. Smoking a cigarette is one such similar addiction that gets many people hooked which people start for different reasons. Many such people who get hooked on smoking make the effort to quit but are unable to quit the urge to smoke. Vapor E Cig is one such device which is created to get people off the bad habit of smoking traditional cigarettes. This device is created as a replica of a real cigarette which gives the user the feeling of using the real thing. The user gets the same feelings that they used to get from a traditional cigarette with the exception of getting rid of the majority of the harmful toxins that people take within their system. This device is made in the shape of a pen which is aimed to give the feeling of a real cigarette so that the user does not miss the feeling of holding a cigarette.

These Vapor E Cig units are made up of three separate devices that work in sequence to make the whole system work. It consists of the atomizer, battery and the inhaler. Smaller devices have only two separate components which are the atomizer and the cartridge. The control of nicotine which is the substance which grabs hold of the smoker comes into the hands of the smoker that has a hard time beating the habit. Nicotine is the substance that enters the blood stream while smoking and builds the need for the habit of smoking over a period of time. As the quantity of this substance increases in the blood stream, the person becomes more addicted to smoking. The frequency f the need that the person needs a smoke increases with the increase in the nicotine levels in the blood creating a vicious circle. This devices helps people not only control the levels of nicotine they take in but also eliminates passive smoking by people around the smoker.

Vapor E Cig is a gadget that any new user can get used to easily even if they are bad with using any gadgets. New users have the option to try out the product with the starter kits which provides them with disposable product that is meant to be used one time. Refillable cartridge device is also available for those who want to try out the product more than one time. This is the higher option available to the new users who can just replace the cartridge once they have finished one. There is also a third option of refillable cartridge which is available in multiple fruit flavors and famous cigarette brand flavors.
