What made Roger Hamilton the nemesis of the flaws in present day economic system? by Corwin Smith

Article published on December 17th 2011 | Others

One of the biggest achievements that the last century has seen was a control and a greater degree of tractability over the actions of human beings in almost all the operations that he is involved in. But one domain that is still not willing to co-operate with the desire of the man to bring it within the control of its creators is the field of finance. The more the efforts are made to bring it under the control the more it spirals out of the strong grip. And there is a strong reason behind the phenomenon. And the irony is that the reason lay in the very inception of the system of finance control. The people who created this system in order to make sure that their would be a smooth functioning of the financial matters no matter whether it is at a microscopic level or at a macroscopic level, the only reason behind it was to ensure a smooth operation. But the very inception of the system had in it some flaws at the very fundamental level. And as a result the enormous structure that this system has assumed is flawed at the very root of it. And only one man was able to understand it and only one man was able to point out the solutions that would rectify the system of the present day finance. And the name of this gentleman is Roger Hamilton.

It would be very interesting to comprehend the background of this man. It would be very interesting to know what made Roger Hamilton the nemesis of all the flaws that the present day financial system is suffering from. It was not a long time back that Roger was an ardent advocate of the present day system that appeared to him as the finest system that had ever been invented in order to make sure that the rotation and revolution of money would continue smoothly and productively. And with the strong belief in this system he dared to dream of raising wealth for himself in a manner that would remain within the system and yet provide him with the best of results in terms of wealth and prosperity. But a decade down the action filled years, this guy realized that the things were not working out the way as he had imagined. And this very thought digressed him from the present system of world economy.

But the new dilemma that he faced was what should be the best next action for him in order to make sure that his life, his dreams, and his aspirations would not bite the dust. A daring man that he is, he took one of the boldest of decisions to find a solution in the form of a system that would set in motion a frictionless operation of the world economy. And that is what he did. Roger Hamilton devised a system that has put an end to all the perils, and all the pitfalls that the till now were prevalent system was plagued with.
