How to have a photo on canvas with special effects by Andrew Bourke

Article published on April 16th 2012 | Photography

Giving someone a canvas print as a gift truly is an amazing gift and they will thank you for ever for it but wouldnâ€™t you like to make the canvas print even more interesting by having some special effects added to it I know I would. By having a canvas photo print on its own is very magical as it is but if you decides to enhance the canvas print with a simple sepia effect or if you was to change your colour photo into a black and white photo before having it transformed into a canvas photo print then it would stand out even more and catch every persona eyes that even comes close to view it as it really does bring life and elegance to a room.

Canvas photo printing is a really popular choice for photogenic artwork that you can have printed as there is a few different way now days to have your photos printed and eve having your photo printed as a normal photograph but printed in sepia colour looks great so just imagine what it would look like blown up onto canvas prints that already look great as a simply colour photograph.

Canvas prints are shown all around the world and even appear in galleries and artwork galleries to. It is a really good alternative if you donâ€™t have much money but yet you still want a great piece of art hanging on your wall at home so you could basically buy a canvas print of the artwork at a much cheaper price and end up with the same results as an original canvas painting or canvas artwork.

Canvas prints can really bring a good feeling to your home and they can also give it lots a character to, many people use canvas print to show off their photos and artwork so it a good idea if you have lots of photos just sitting in a draw that could use some attention because allot of people normally go for the easy alternative which would be have the photos in side picture frames and donâ€™t get me wrong, having a photo inside of a picture frame is an amazing invention in its self but if you want to be a little more different and celebrate your most prized photos then having them printed onto a beautiful woven fabric that is stretched over a real wooden frame to give a much wanted and loved arty look then canvas prints and printing photos on canvas is the thing for you. The way that canvas prints is made to is a very interesting thing to as not only does the canvas printer use only the highest of materials but the workmanship that goes into the making of printing photos on canvas is a work of art in its self and that sort of service I would say is a valuable thing to, not to mention that normally when you purchase a canvas print itâ€™s going to be from an online retailer so having a great customer experience before receiving your canvas print order is always a very good bonus to.
