Proaim Ladder Slider Dolly Track Tripod Mount for Fluid Head DSLR HDV Video Camera by Brent Crosby

Article published on July 17th 2012 | Photography

While capturing movie or, commercial videos, people usually need some kind of apparatus that can move the cameras that will help to capture images or, videos of the moving people well. Now, there are many such moving apparatus for cameras in the market, but not many few are as famous as well as as good as the Proaim ladder slider. Basically this kind of moving apparatus is known as camera dolly slider. Now, there are various such kinds of products in the market from the house of Proaim. Now, in the recent days, Proaim has launched their newest product in the market in this camera slider range, and this all new Proaim D-10 ladder dolly is the amongst the best in the market right now. If you are looking to take professional video, then it is the ultimate option for you as it is designed completely for expert film makers. This ladder slider comes with 6 feet long track with a dolly, along with 1 PC bowl adaptor. However, with this camera dolly track, no kind of tripod stand is available, and camera and fluid head also donâ€™t come with these sliders.

The revolutionary technology of this all new D-10 camera dolly track with a slider can work with video cameras like â€“ SLR, DSLR, and HD and so on. It includes an incorporated multi-purposeful desktop rail mechanism with a portable design that exceeds everyoneâ€™s imagination. The best feature of this ladder slider is that, it can set flat in the ground or, in an oblique mode, and even one can set it at a certain angle as well. So, this is really useful for taking a picture from different perspectives. The D-10 camera dolly slider from the house of Proaim can carry a weight of 5 kilograms when it is set up with the tripod mount, camera and all, but when it is laid in the ground, then it can carry weight of about 9 kilograms which will help you move high weight cameras over it. There are many places in which one can mount the tripod in this camera ladder slider. With the advanced mechanisms of the dolly, it can be used without the help of slider track. The best thing about this camera slider is that it is very easy to set up and compatible with up to 100 mm of fluid heads. The weight of the complete system is about 8 kilograms which is not very high to carry, and most of all, the cost of this system is near about 600 $ US which is really amazing for such a useful apparatus.
