In case youâ€™ve recently purchased an expensive digital camera, you must be worried about keeping it safely. Here, camera bags can come to your rescue! If youâ€™re fond of traveling, you can easily carry your cams in these special cases. Thus, a case or a pouch is a good investment for your photography equipment.

Camera bags not only protect your equipment from external elements and regular wear and tear but they also let you carry other photography-related stuff along with you! Different varieties of cases and bags are available in the market.

Here is a list of some popular camera bags:

Shoulder camera bags: You can sling these pouches over your shoulder. They generally come in different shapes, sizes, textures, materials and colors. They have wide straps and can easily accommodate lenses, batteries, battery chargers, memory cards, tripods and other accessories. They are comparatively large in size as compared to other cases.

Waist pack camera bags: Theyâ€™re also known as belt-pack bags. Theyâ€™re available in two forms: They either come with a padded belt that can be worn around your waist or they come in belt-less models. The belt-less versions are simple pouches that include a snap-lock with the help of which you can attach the pack to your belt. Since theyâ€™re compact, they come in small sizes and at affordable prices. However, a drawback is that you canâ€™t keep bigger accessories inside it.

Sling camera bags: Sling bags are quite similar to a typical college bag or backpack that students carry. Following a traditional pattern, these bags can be opened from one side and have a single back strap that is slung diagonally across your shoulders. They are portable and available at economical prices, hence most students prefer to purchase them.

Holster camera bags: These cam cases are streamlined, easily portable and convenient to carry while traveling. They can hold multiple small-sized accessories. They have a shoulder harness that fastens on your shoulder without blocking your view. Moreover, you can easily access your instruments while hiking or riding your bikes.

These were some common types of Camera Bags available in the market. You can choose any model as per your personal preferences. These versions are available at shopping malls, gadget shops, branded stores and on-line websites as well. You just need to take some time to find the right option.
