- Profiles of the top construction companies in the BRIC countries

- Profiles of the ten largest construction projects in the BRIC countries.

Summary

Despite differing significantly from each other in terms of politics, geography, culture and type of economy, the BRIC countries â€" Brazil, Russia, India and China â€" were combined to demonstrate the growing importance of these nations in the global economy. Due to the developing phase of the BRIC economies, the construction industry plays a significant role for all member countries. The important and common factors significantly affecting the construction industry in the BRIC countries include growing population (except in Russia), rapid urbanization and industrial development. In addition, rising levels of disposable income are also driving growth with demand for improved facilities and public infrastructure.

As a result of these factors, the value added to the construction industry in BRIC recorded a CAGR of XX.XX% during the review period. The Chinese market, which accounted for XX.X% of the value added to the construction industry in BRIC in 2010, recorded the highest CAGR of XX.XX% during the review period, and in the process recorded an increase in its market share by X.X percentage points to XX.X% by 2010. Apart from increasing urbanization and the Western China Development program, the most significant factor driving growth in the Chinese market during the review period was the initiation and completion of several significant infrastructure projects as part of the countryâ€™s preparations for the 2008 Olympic Games. With a XX.X% market share in 2010, India was the second-largest construction market within BRIC, followed by Brazil with XX.X% and Russia with XX.X%.
