Article published on April 19th 2012 | Recreation

Cars are important to daily living. The economy needs vehicles to transport products which generate income for different industries. Vehicles, whether public or private also bring people to work to give them income which will propel the economy. Vehicles are integrated to our way of life that almost all our activities use vehicles to help us move around and get things done.

Hyundai is a maker of quality cars that many people have been using for years. The Hyundai Motor Company was founded a few years after the establishment of the Hyundai Engineering and Construction Company. Their first car model, the Cortina was made in 1968 in cooperation with the Ford Motor Company. Years later, they hired George Turnbull when they decided to develop their own cars. Pony, the first Korean car that came out was styled by Giorgio Giugiaro and used Mitsubishi Motorâ€™s powertrain technology.

Hyundai makes a range of vehicles from cars to SUVs. They have a large collection of sedans and coupes that has varying features. Sedans are four-seater cars, typically with four doors, and a full-height; coupes are two-door cars with 2 to 4 seating capacity.

Hyundaiâ€™s Genesis car has two different models, a sedan and a coupe. The Genesis Sedan is crafted to provide mobility in luxury and performance. The Genesis Coupe is a sports vehicle designed for high speed driving and maneuverability.

The Genesis Sedan offered by auto Edmonton dealers has varying trims with powertrain options from 3.8 V6, 4.6 V8, and 5.0 V8 engines equipped with an average fuel efficiency of 9L per 100km in both city and highway driving. These trims are all fitted with an 8-speed automatic shift interlock, SHIFTRONIC and a drive configuration of the rear wheel drive. Its features include the telescoping tilt steering wheel, speed control, remote keyless entry and overhead consoles. The Genesis Sedan is also fitted with power passenger seats, heated bucket front seats and leather upholstery.

The Genesis Coupe is available from car dealers Edmonton residents prefer in 2.0T and 3.8 trims with 2.0L and 3.8L displacement. It is equipped with a twin-scroll turbocharged intercooled inline 4-cylinder and V6 cylinder configuration and a rear-wheel drive type. It comes in 6-speed manual transmission and 8-speed electronic automatic with lock-up torque converter and paddle shift options.

The Coupe has an average fuel efficiency of 8.3L per 100km with maximum seating capacity of four including the bucket front seats and the bench rear seats. Both cars offer features and functionality that match most car buyersâ€™ preference. You can visit car dealerships Edmonton car buyers trust to view these cars.
