Stay safe using Climbing Equipment designed to make climbs easier by Julia Roger

Article published on January 3rd 2012 | Recreation

Safety is of the utmost important for climbers and they make careful considerations when choosing Climbing Equipment to ensure climbs are eventful for all the right reasons. Seasoned climbers get to know the types of Climbing Equipment that will help to keep them safe during various climbs, but what happens if you are a novice climber? How do you know if the Climbing equipment you choose is suitable for a first time climb?

Obviously you put a lot of faith in your climbing instructor if youâ€™re a novice climber. You rely on them to hook you up to sturdy ranges of Climbing Equipment, proven products that are designed for safety and comfort. Armed with the right Climbing Equipment and with a decent pair of climbing shoes, youâ€™ll soon get to grips with surface of all types.

Starting out with the basics

Climbing equipment will vary depending on the types of climbs you plan on undertaking. If you are hoping to tackle tough mountain terrains technical types of Climbing Equipment will be required.

One of the most essential items of Climbing Equipment, apart from a sturdy pair of climbing shoes, is the harness that attaches to the ropes. A safety harness is a vital item of Climbing Equipment and when itâ€™s combined with a securely anchored rope, it can act as a life saver should you take a tumble from the surface of the rock.

Itâ€™s vital to choose the right type of harness as part of your Climbing Equipment, one that offers comfort but total support.

Weigh up what the harness will be used for

Consider the types of terrains that your Climbing equipment has to cover. Do you intended to speed up rock faces taking part in sports climbing or will you be tackling some of the toughest mountain regions known to civilized society? This will have a say in your choice of Climbing Equipment and in particular, the harness that you use. Use lightweight Climbing Equipment on a demanding climb and youâ€™ll be asking for trouble. On the other hand, do you really need a cumbersome climbing harness to take part in a sports climb, would other Climbing Equipment be more suitable?

Familiarise yourself with the various types of Climbing Equipment that are on the market from climbing shoes to backpacks, weather-repellent clothing to climbing tools and youâ€™ll stay safe in all types of conditions.
