Article published on June 26th 2012 | Religion

Scriptures, the very base of the Christian faith has many interpretations of it. It is a source of strength for many to live a pious life or some seek to get valuable insight regarding how to get back their lives on track. How to live a bit better life- this is what biblical truth answers. As a true hearted Christian, reading the Holy Bible and its verses is a must. The Bible holds the very mysteries of life and solutions to the problems of life. A devout follower of the biblical truth will have the knowledge to derive the truth of the Holy Scripture and consider the other perspectives.

There are many who consider the Holy Bible as a piece of literature. Those who count this fact often neglect the spiritual aspect that is a part of this book. At the same time, the Christian truth can never be fully realized by reading the scripture from the perspective of a piece of literature. Those who want to read it keeping the fact aside; they are actually not being able to connect with it. Non Christians have this belief that the Lordâ€™s own Words are not what is being laid down in the scriptures. Interestingly enough, the teachings of the holy book can be counted as works of literature on the base of its ability to storm up attractive debates.

The Holy Bible was a part of history but never was it to be studied from that point of view. Contradictions arise however as it is proved that the holy bible is the only book in the history of mankind where the Christian movement in history is maintained in such details. If Christians are thinking of deriving spirituality in this, then they are wrong. What can thus be pointed out is that the Holy Bible jots down and preserves the experiences of time.

It feels comforting therefore to think of the Holy Bible as a holy scripture that is to be read just along the same lines to derive happiness and contentment. It is perceived as the Word of the Lord that brings comfort in the lives of people who are broken and tired of facing the challenges and adversities of life.

It can therefore be said that the Holy Bible is a versatile book. It has recognition of its own and can be interpreted, read and understood according to the wishes of the readers. Generally, three levels of interpreting the scripture have been found out. These are Secularism where it is believed that the Holy Scripture is written down by humans. Then there is modernism according to which the Holy Bible was put into words by mere human beings sharing a certain kind of closeness with God. The last line of belief is fundamentalism according to which it is God Himself who has authored the scriptures.

True Christianity believes in faith being spontaneous. It is something that comes straight from the heart and so no interpretations of the Bible can be thrust upon anybody. Biblical truth is all about being freed from the shackles of the adversities of life. It is a platform to connect with Jesus and make life a bit more meaningful.
